— STATE SCHOOLS DIVISION

School Migration Orchestration Platform

A purpose-built control platform for large-scale
migration delivery across 1,500+ schools

THE CHALLENGE

Why purpose-built tooling matters

Scale

1,500+ schools across distributed delivery teams, regions, and timeframes

Disconnected Tools

Spreadsheets, emails, and manual tracking create silos and delivery risk

No Visibility

No real-time view of readiness, gate status, bottlenecks, or risk

Admin Overhead

High manual effort for scheduling, status updates, and coordination

Comms Risk

Inconsistent, uncoordinated communications sent to school contacts

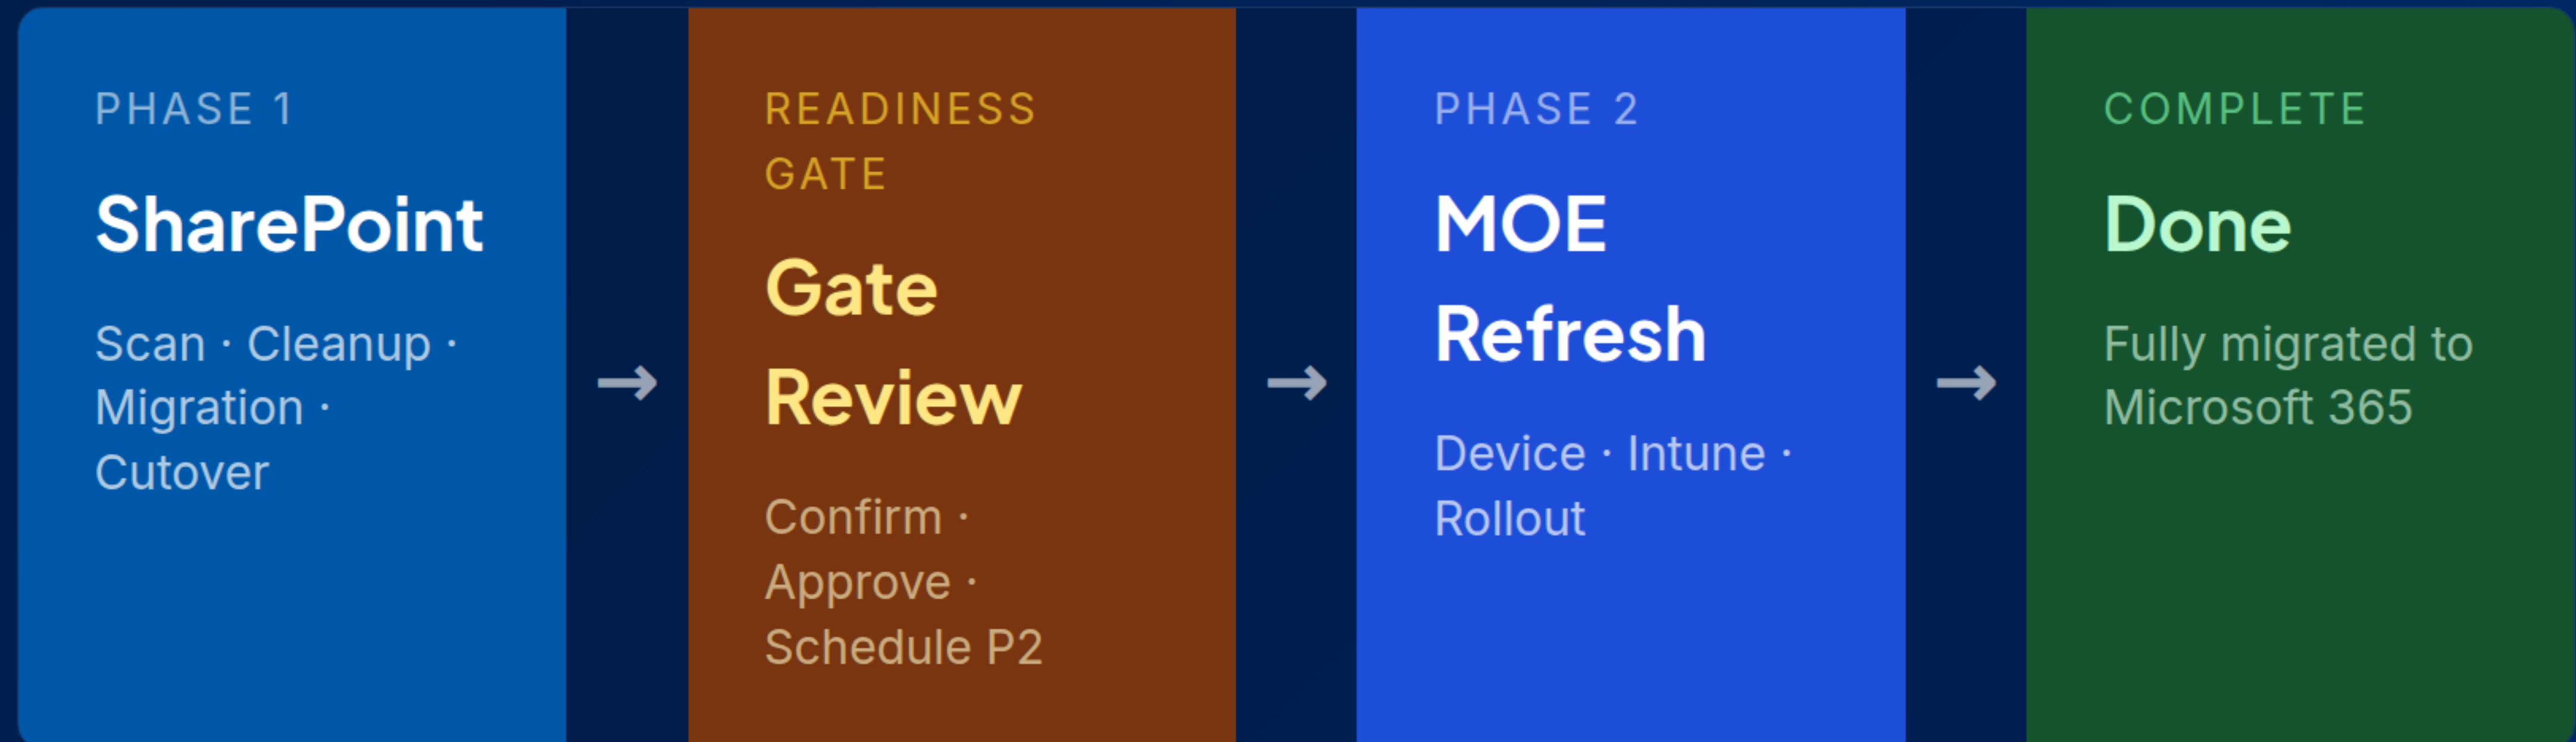

Delivery Confidence

No single source of truth for leadership and program sponsors

SOLUTION OVERVIEW

One Platform. Controlled Delivery.

A gated migration model ensuring schools progress only when ready.

Every school follows a controlled, gated progression — no school advances without meeting criteria

What the platform delivers

Centralised Visibility

A single pane of glass across all schools, phases, and gates

Controlled Execution

Gated progression prevents premature advancement and delivery risk

Delivery Confidence

Leadership has real-time program health with no manual reporting lag

Reduced Overhead

Replaces spreadsheets and manual workflows with structured tooling

Risk Clarity

Blocked schools and bottlenecks surfaced immediately for intervention

AI-Assisted Insight

Built-in assistant answers programme questions in plain English — no SQL, no spreadsheets

Functional Capabilities

Dashboard + Map

Live programme metrics with QLD-wide schools map

Schools Register

Per-school lifecycle tracking and bulk actions

Waves

Group schools into planned delivery waves

Issues Register

Track, triage, and resolve delivery blockers

Communications

Template-driven comms with M365 integration

Reports

PDF reports drawn from live programme data

Bulk Import

CSV / JSON upload with validation and templates

Administration

Audit log, security panel, user feedback inbox

Microsoft SSO

Tenant-locked Entra sign-in via Clerk

AI Assistant

Read-only chat grounded in live programme data

In-App Tour

Guided onboarding for new programme staff

1,500+ Schools

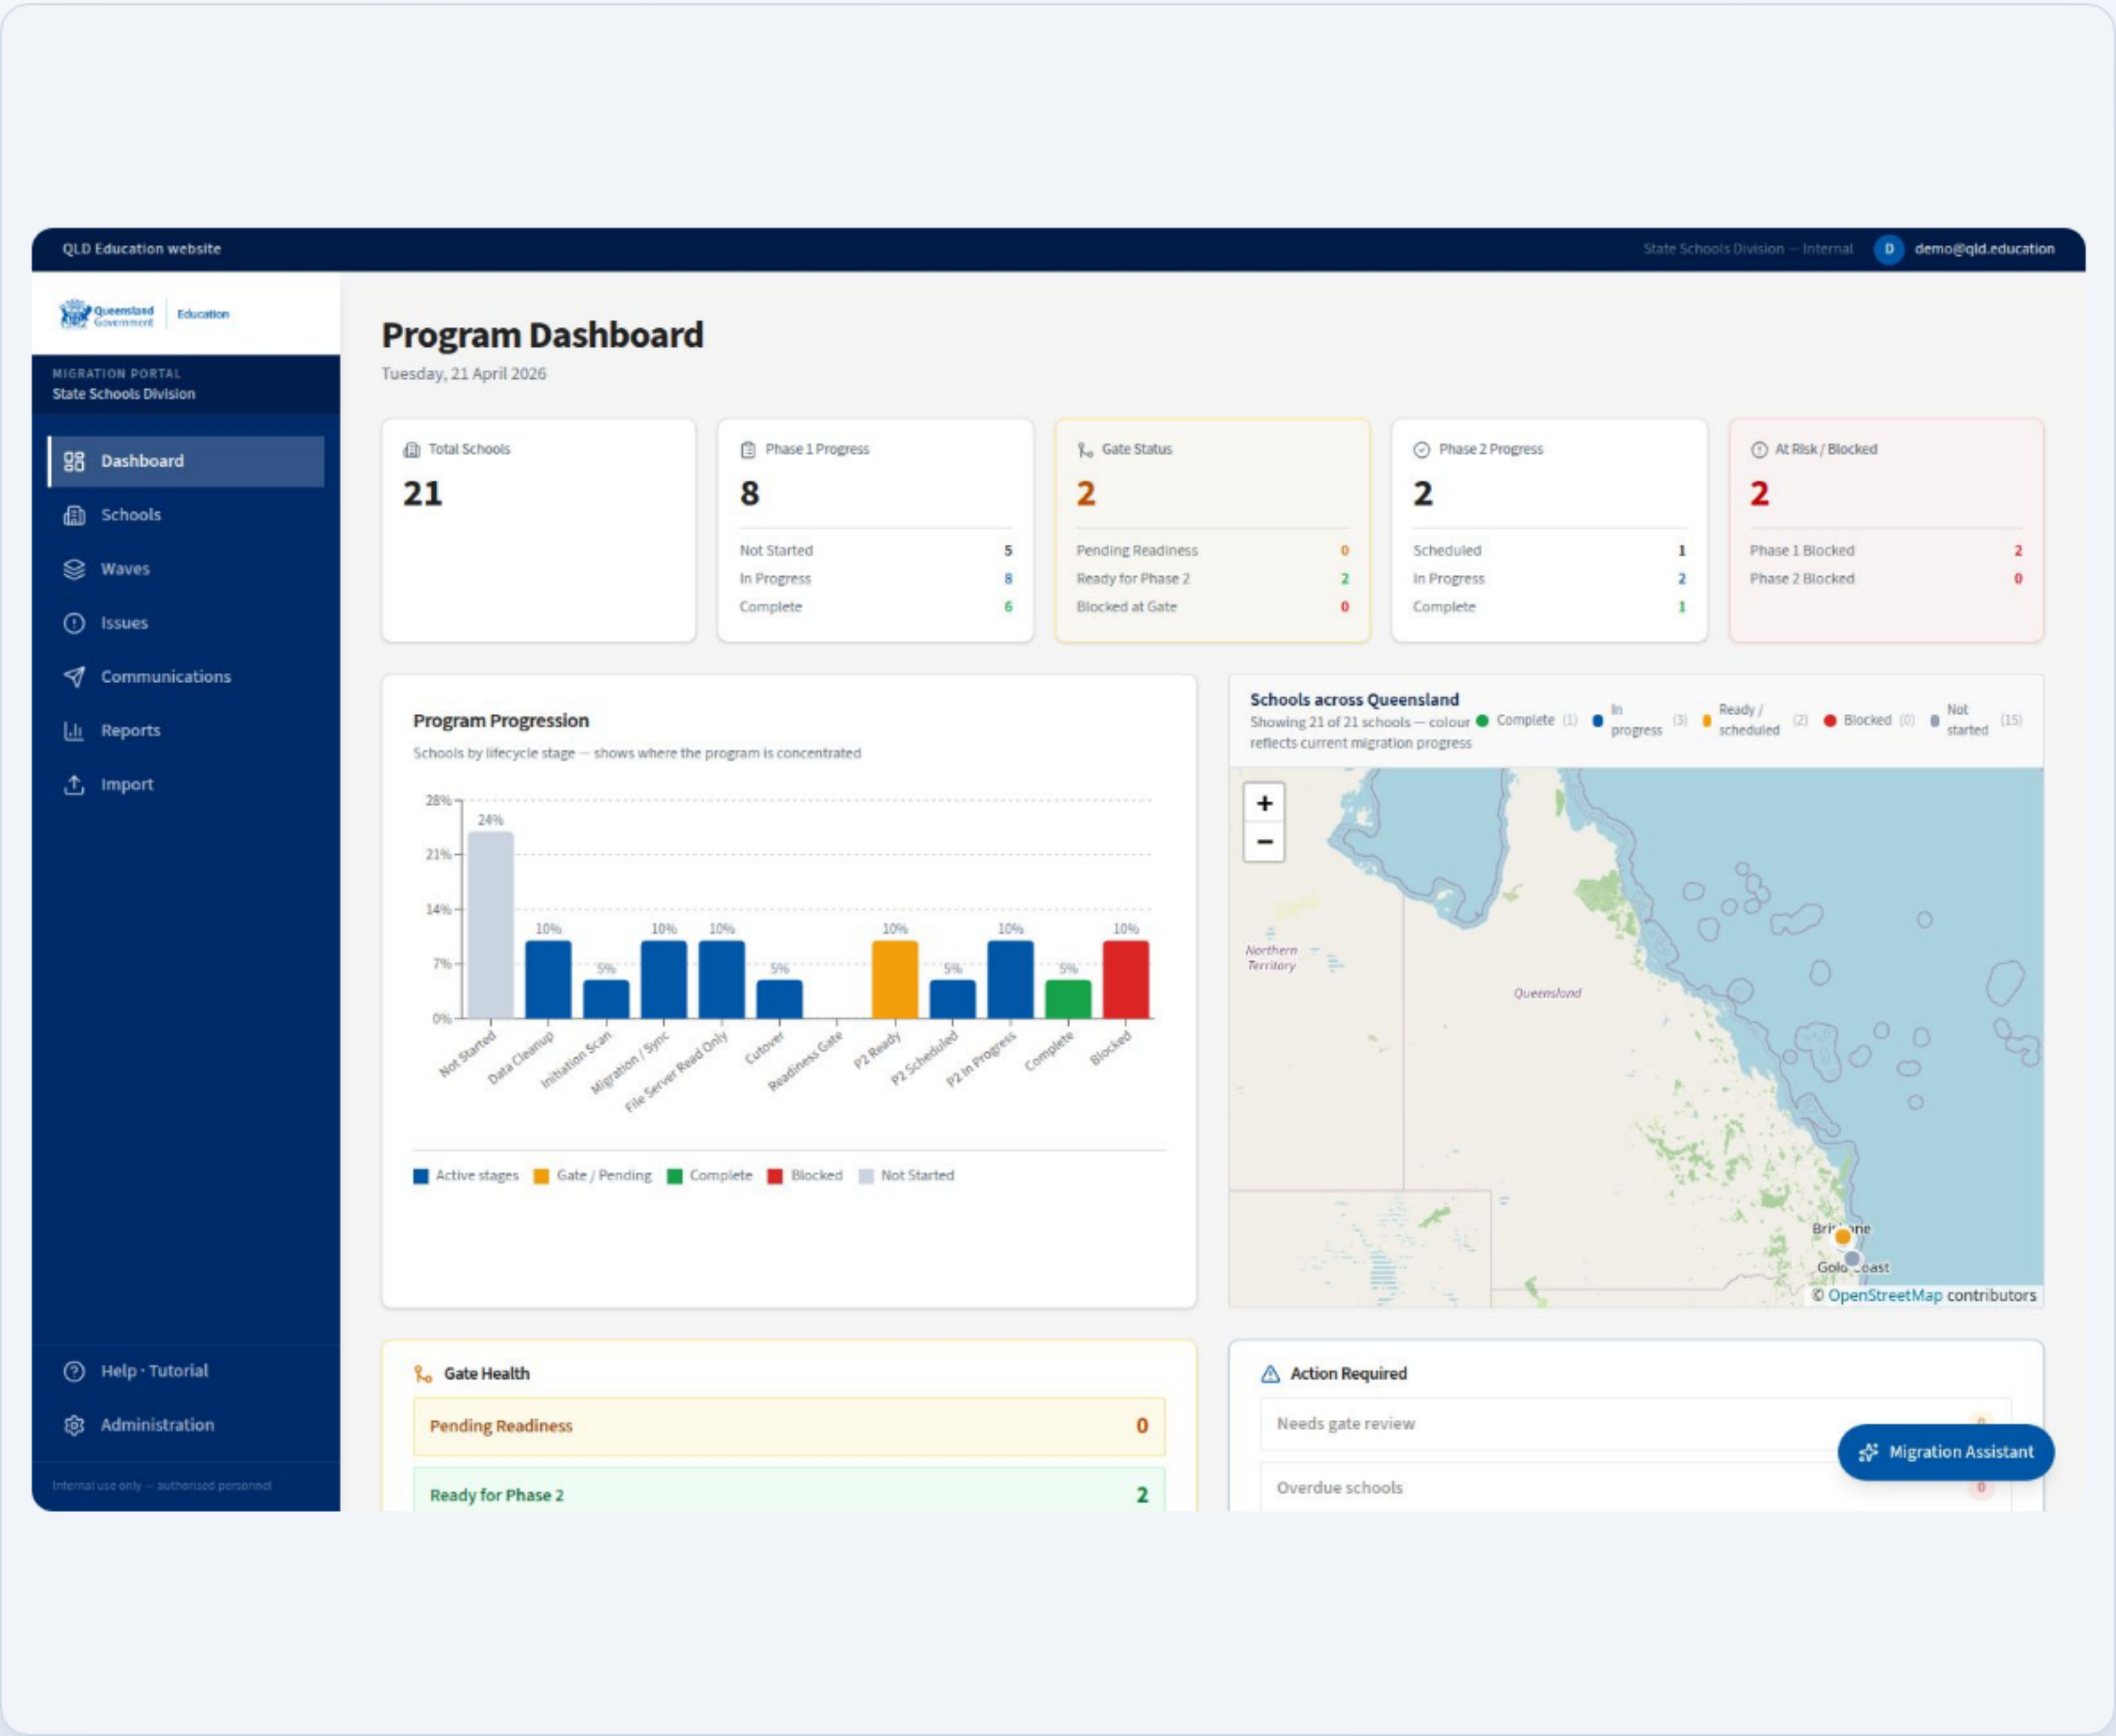

Built to scale across the full Queensland program

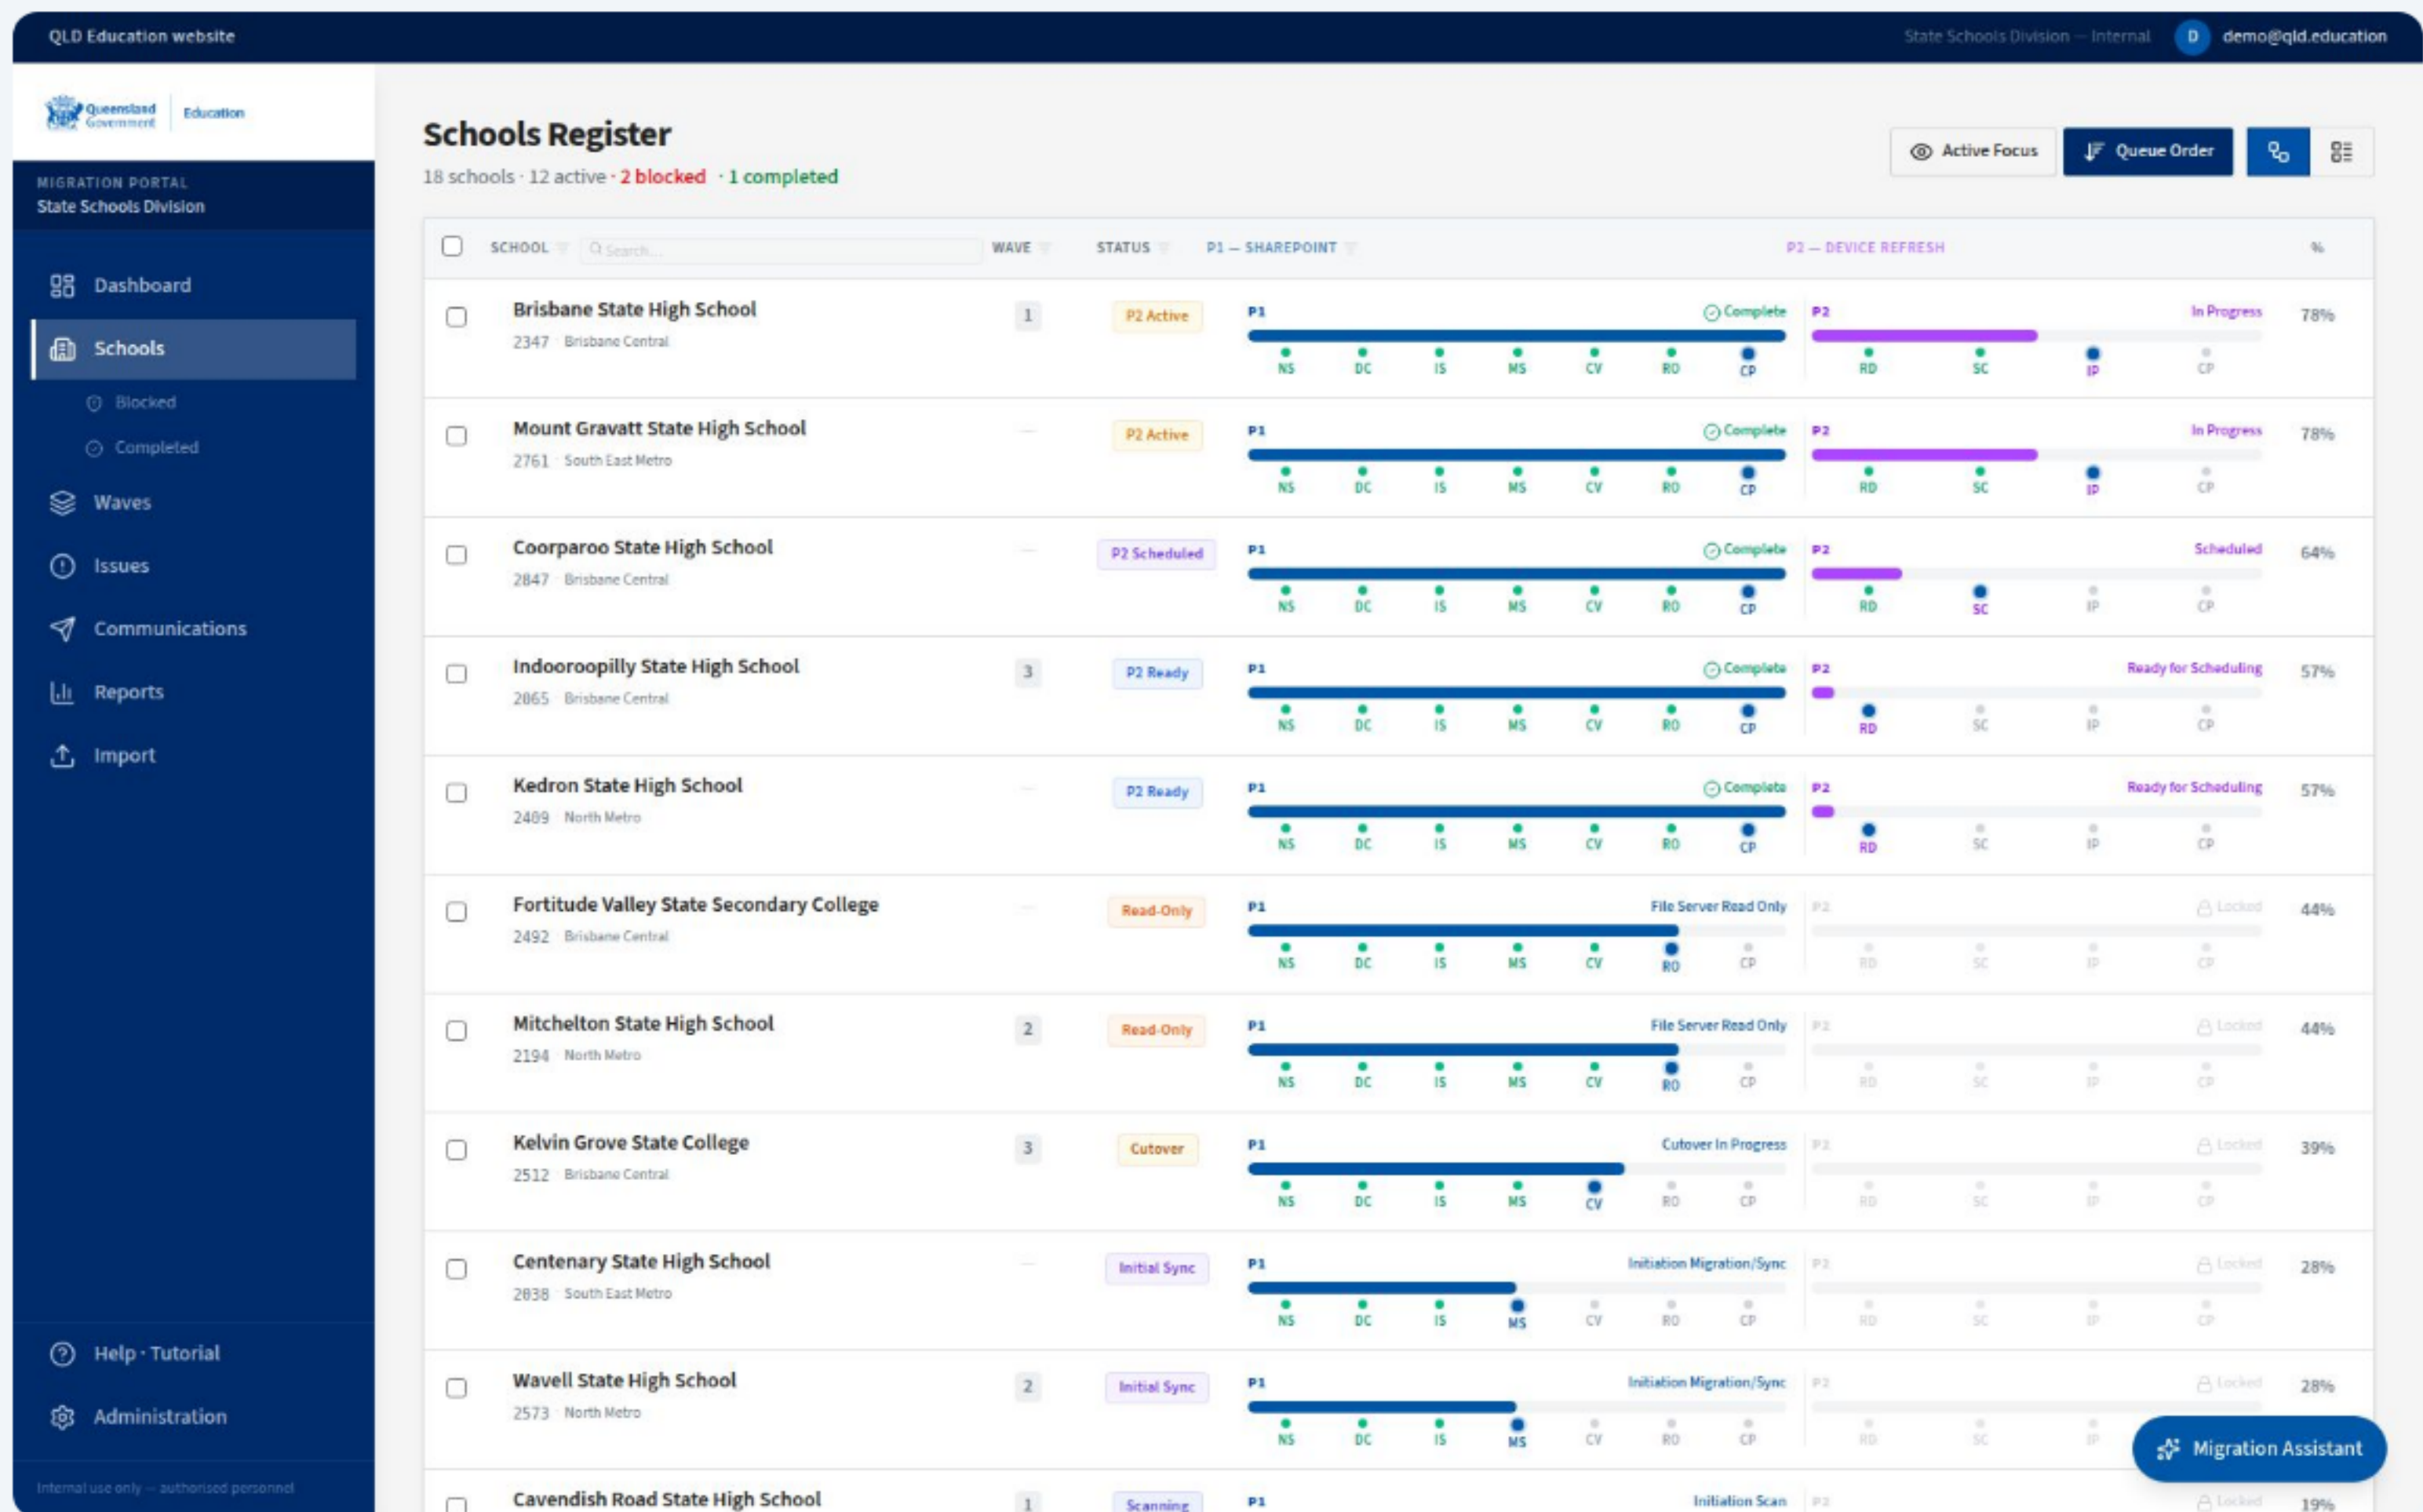

DASHBOARD

Program Control Panel

Operational command view — live status across all schools and phases.

- Phase Progress**
Phase 1, Gate, Phase 2 breakdown
- Progression Chart**
Schools by lifecycle stage, colour-coded
- Action Required**
Overdue, blocked, ready to schedule
- At Risk Schools**
Clickable list — opens school record

SCHOOLS REGISTER

Execution Engine

Every school's full migration lifecycle in a single, actionable view.

Dual Lifecycle Bars

P1 and P2 progress visible per school

Status Badges

P2 Active, Cutover, Gate, Blocked and more

Bulk Actions

Update status and assign waves at scale

Sub-views

Blocked Schools and Completed Schools filters

WAVES

Waves Management

Group schools into delivery waves aligned to your schedule and regional planning.

Flexible Grouping

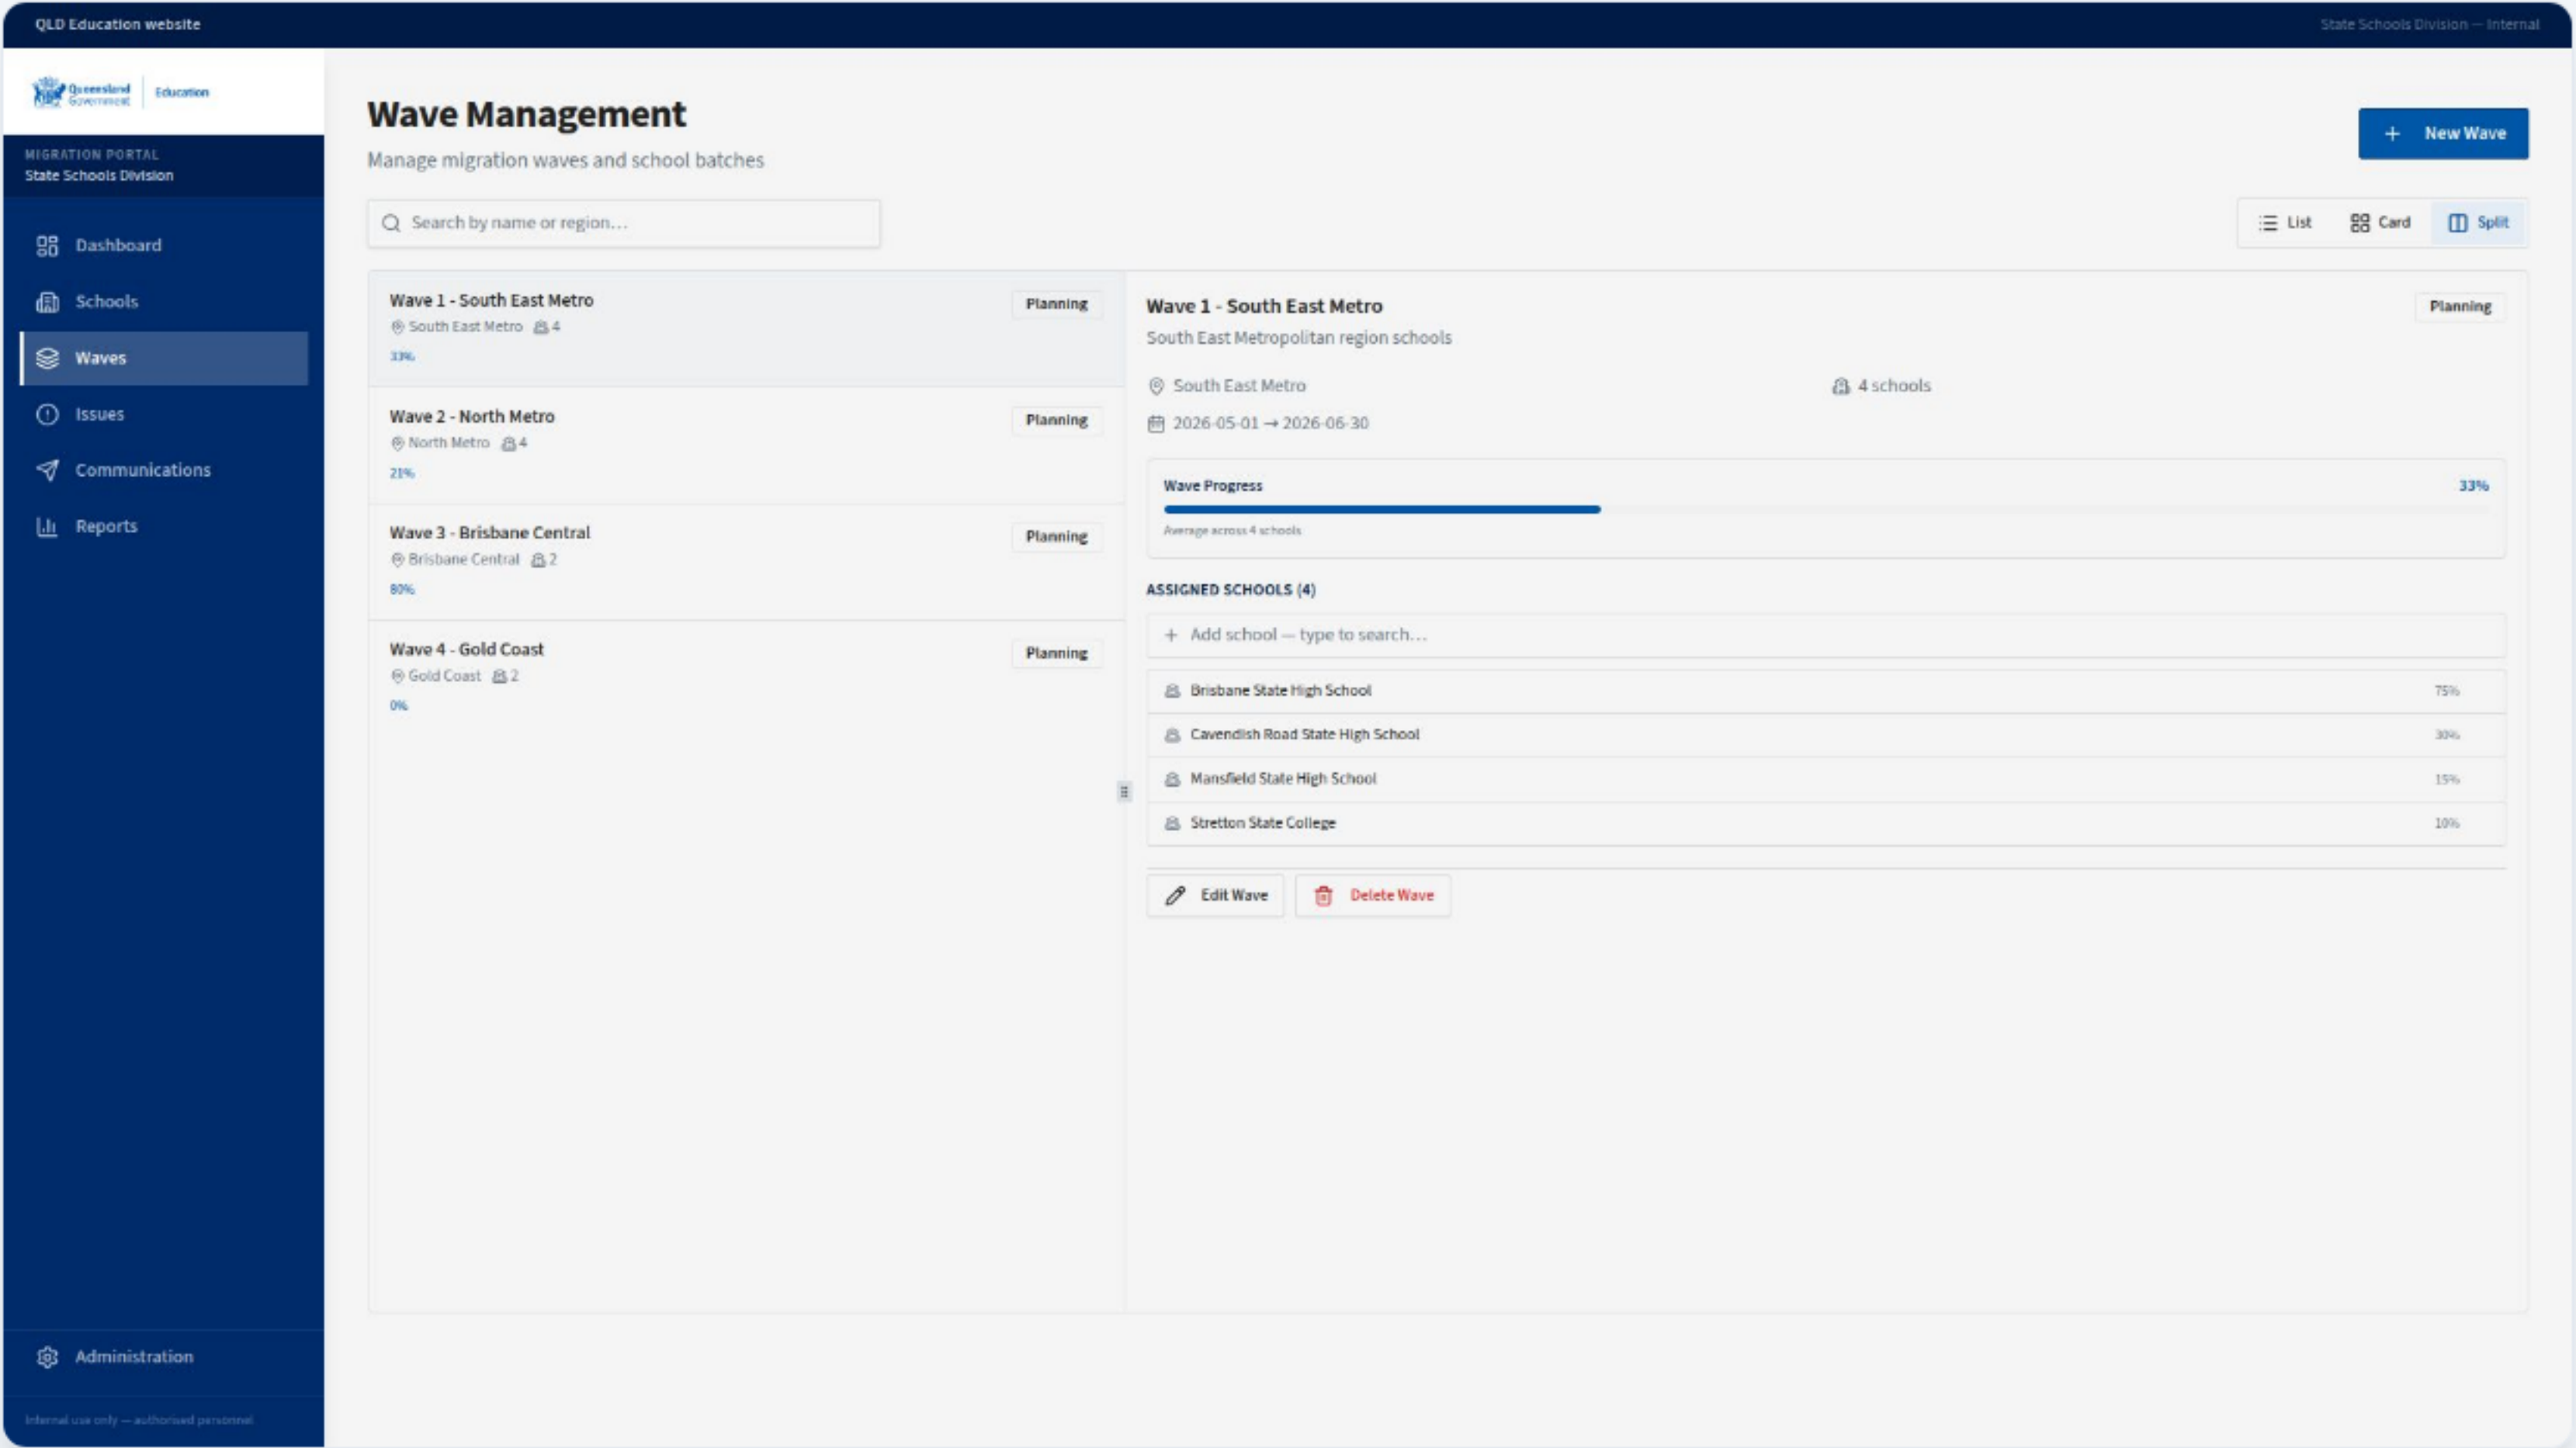

Assign schools by region, schedule, or readiness

Card, List, Split Views

Multiple layouts to match your workflow

Per-wave Progress

Progress bars and school counts per wave

Triage, track, and resolve delivery blockers

■ Per-School Issues

Log and track issues against individual school records. Every issue has a severity, status, and owner.

■ Problem Records

Link issues from multiple schools to a common problem record — enabling pattern visibility across the program.

■ Triage Workflow

Open, in-progress, and resolved states with clear escalation paths and resolution tracking.

■ Recurring Patterns

Identify recurring blockers across schools — enabling proactive intervention before issues spread.

COMMUNICATIONS

Template-driven comms with M365 alignment

Change managers review and send coordinated communications — pre-populated, targeted, and audit-logged.

M365 Native Workflow

Opens Outlook with school contacts pre-populated in BCC. Edit before sending — no data leaves the platform.

Send Communications Flow

- 1 Select Schools**
Choose recipients from the Schools Register
- 2 Choose Template**
Outlook-compatible templates with merge fields
- 3 Review in Outlook**
Contacts pre-loaded in BCC — edit before sending
- 4 Logged Automatically**
Communication event recorded in platform audit log

Insight and data management at scale

Reporting

| Program Dashboard

Live metrics and progression across all schools

| Configurable Views

Filter, group, and sort to match reporting needs

| Exportable Data

Designed for tailoring to project reporting requirements

Data Management

| Bulk Import

CSV and JSON import with validation and preview

| Scalable Onboarding

Load 1,500+ schools via structured data import

| Data Templates

Downloadable CSV and JSON templates for data preparation

Non-Functional Requirements

■ Identity and Access

Tenant-locked Microsoft Entra SSO via Clerk

HTTP-only session cookies, JWKS validation

Role-based access control — admin and standard tiers

■ Security and Compliance

HSTS, helmet headers, per-route rate limits

Server-side Zod validation on every write

Audit log captures sign-ins and admin actions

■ Architecture

Native API integration with internal systems

Scalable, extensible application architecture

Supports internal hosting patterns if required

■ Data Handling

Designed with minimal PII storage principles

Operational data model — school codes, not personal data

Secure integration patterns for external data sources

DEPLOYMENT

Hosting and Portability

Cloud-Ready Demo

Can be demonstrated and hosted in a rapid cloud development environment for evaluation purposes

Portable Architecture

Architecture supports portability and transition to internal hosting environments if required

Enterprise Alignment

Designed to support integration into internal environments and can be aligned to enterprise standards

Claims regarding hosting, environment, and compliance are framed as architectural intent and design consideration, not deployment assurance. Specific environment requirements should be confirmed through discovery.

FLEXIBILITY

Tailoring and Extensibility

The platform is built as a flexible delivery tool — not a rigid, one-size-fits-all system.

Each capability can be extended, tailored, or configured to match your program's operating model.

Future Automation

Architecture supports future automation and integration opportunities

What can be tailored

Workflows

Stages, statuses, and gate criteria

Comms Templates

Content, merge fields, and audience

Reports

Configurable views and export formats

Integrations

API-first design supports external connections

Operational Views

Dashboard and queue layouts for your team

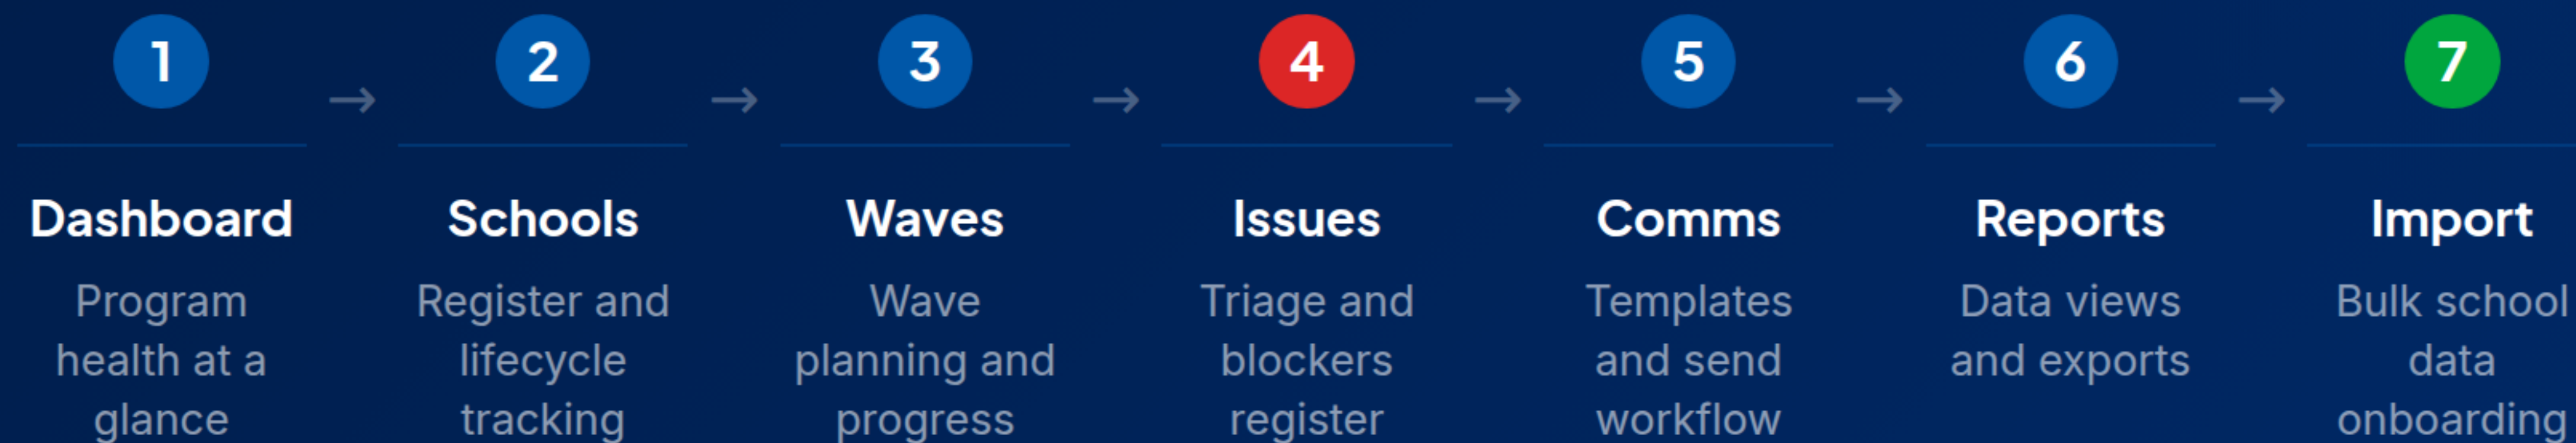

Future Phases

Reusable pattern for subsequent programs

LIVE DEMONSTRATION

Solution Play-by-Play

Live product — all data shown is representative demonstration data

— WHY THIS MATTERS

Controlled delivery. At scale. From day one.

- Fragmented coordination becomes structured execution
- Confidence for project teams, delivery leads, and leadership
- Visibility, governance, and scalability in one platform
- A reusable delivery pattern for future transformation programs

— FEATURE WALKTHROUGH

Platform Tour

A page-by-page walkthrough of every feature built into the platform — including the latest additions: schools map, AI assistant, in-app guidance, and Microsoft sign-in.

AI Assistant

NEW

Tenant-Locked Sign-In with MFA + Conditional Access

Sign-in is brokered by Clerk, but every authenticator is a Queensland Government Entra ID account. No personal Microsoft accounts. No external identities. No exceptions.

■ Tenant Lock

SSO restricted to the QLD Department of Education Entra tenant. No personal Microsoft accounts, no guest accounts, no other tenants — enforced at the identity provider, not in app code.

■ MFA Enforced

Multi-factor authentication is mandatory for every sign-in. Inherits the Department's existing MFA policy — Authenticator app, FIDO2 security key, or phone-based factor.

■ Conditional Access

Departmental Conditional Access policies apply automatically — compliant device, trusted location, sign-in risk evaluation, and session lifetime are all controlled centrally by the Department's identity team.

Dashboard

Programme control panel — live metrics, geography, and what needs attention today.

5 Headline Metrics

Total, Phase 1, Gate Status, Phase 2, At Risk

Schools Map NEW

QLD-wide map with status-coloured markers per school

Progression Chart

Schools by lifecycle stage — colour-coded breakdown

Gate Health

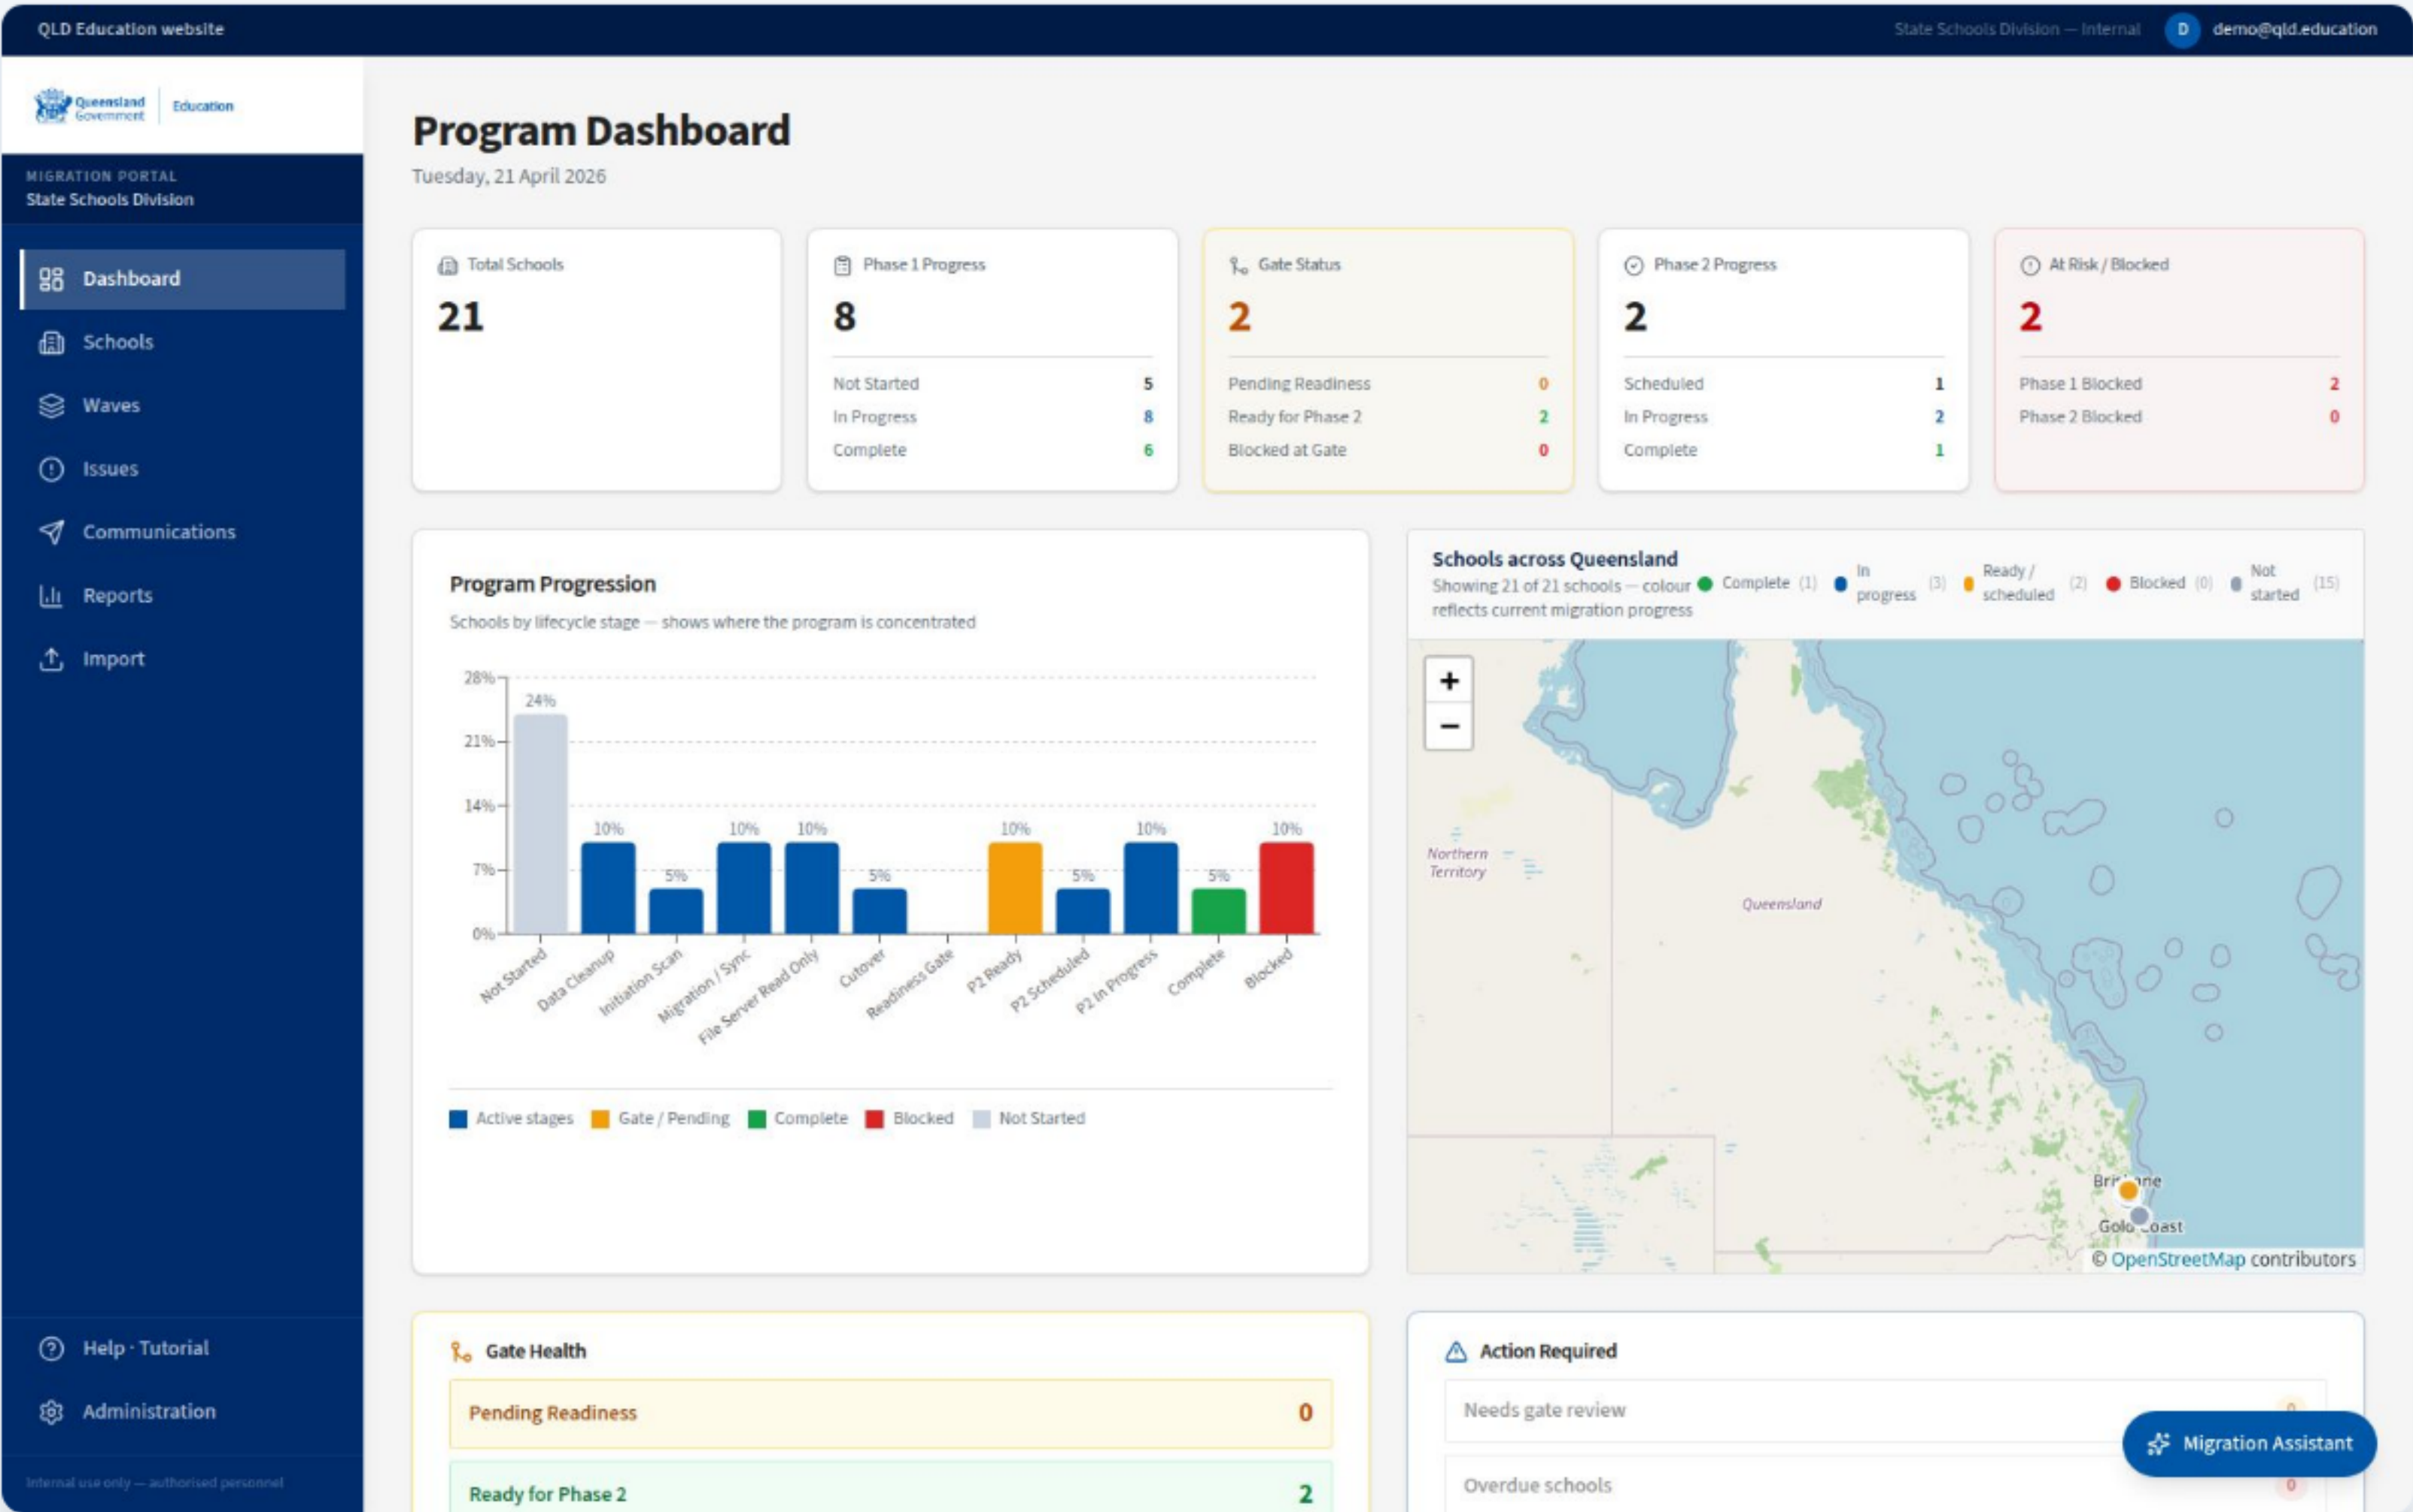

Pending Readiness, Ready for Phase 2, Blocked at Gate

Action Required

Needs gate review, overdue, blocked, ready to schedule

Migration Assistant NEW

Persistent chat button — ask questions about live programme data

Schools Register

The execution engine — every school's lifecycle tracked in detail.

Dual Lifecycle Progress Bars

Phase 1 and Phase 2 visualised per row

Rich Status Badges

P2 Active, Cutover, Gate, Cleanup, Blocked and more

Wave Assignment

Wave number visible per school, assignable in bulk

Active Focus / Queue Order

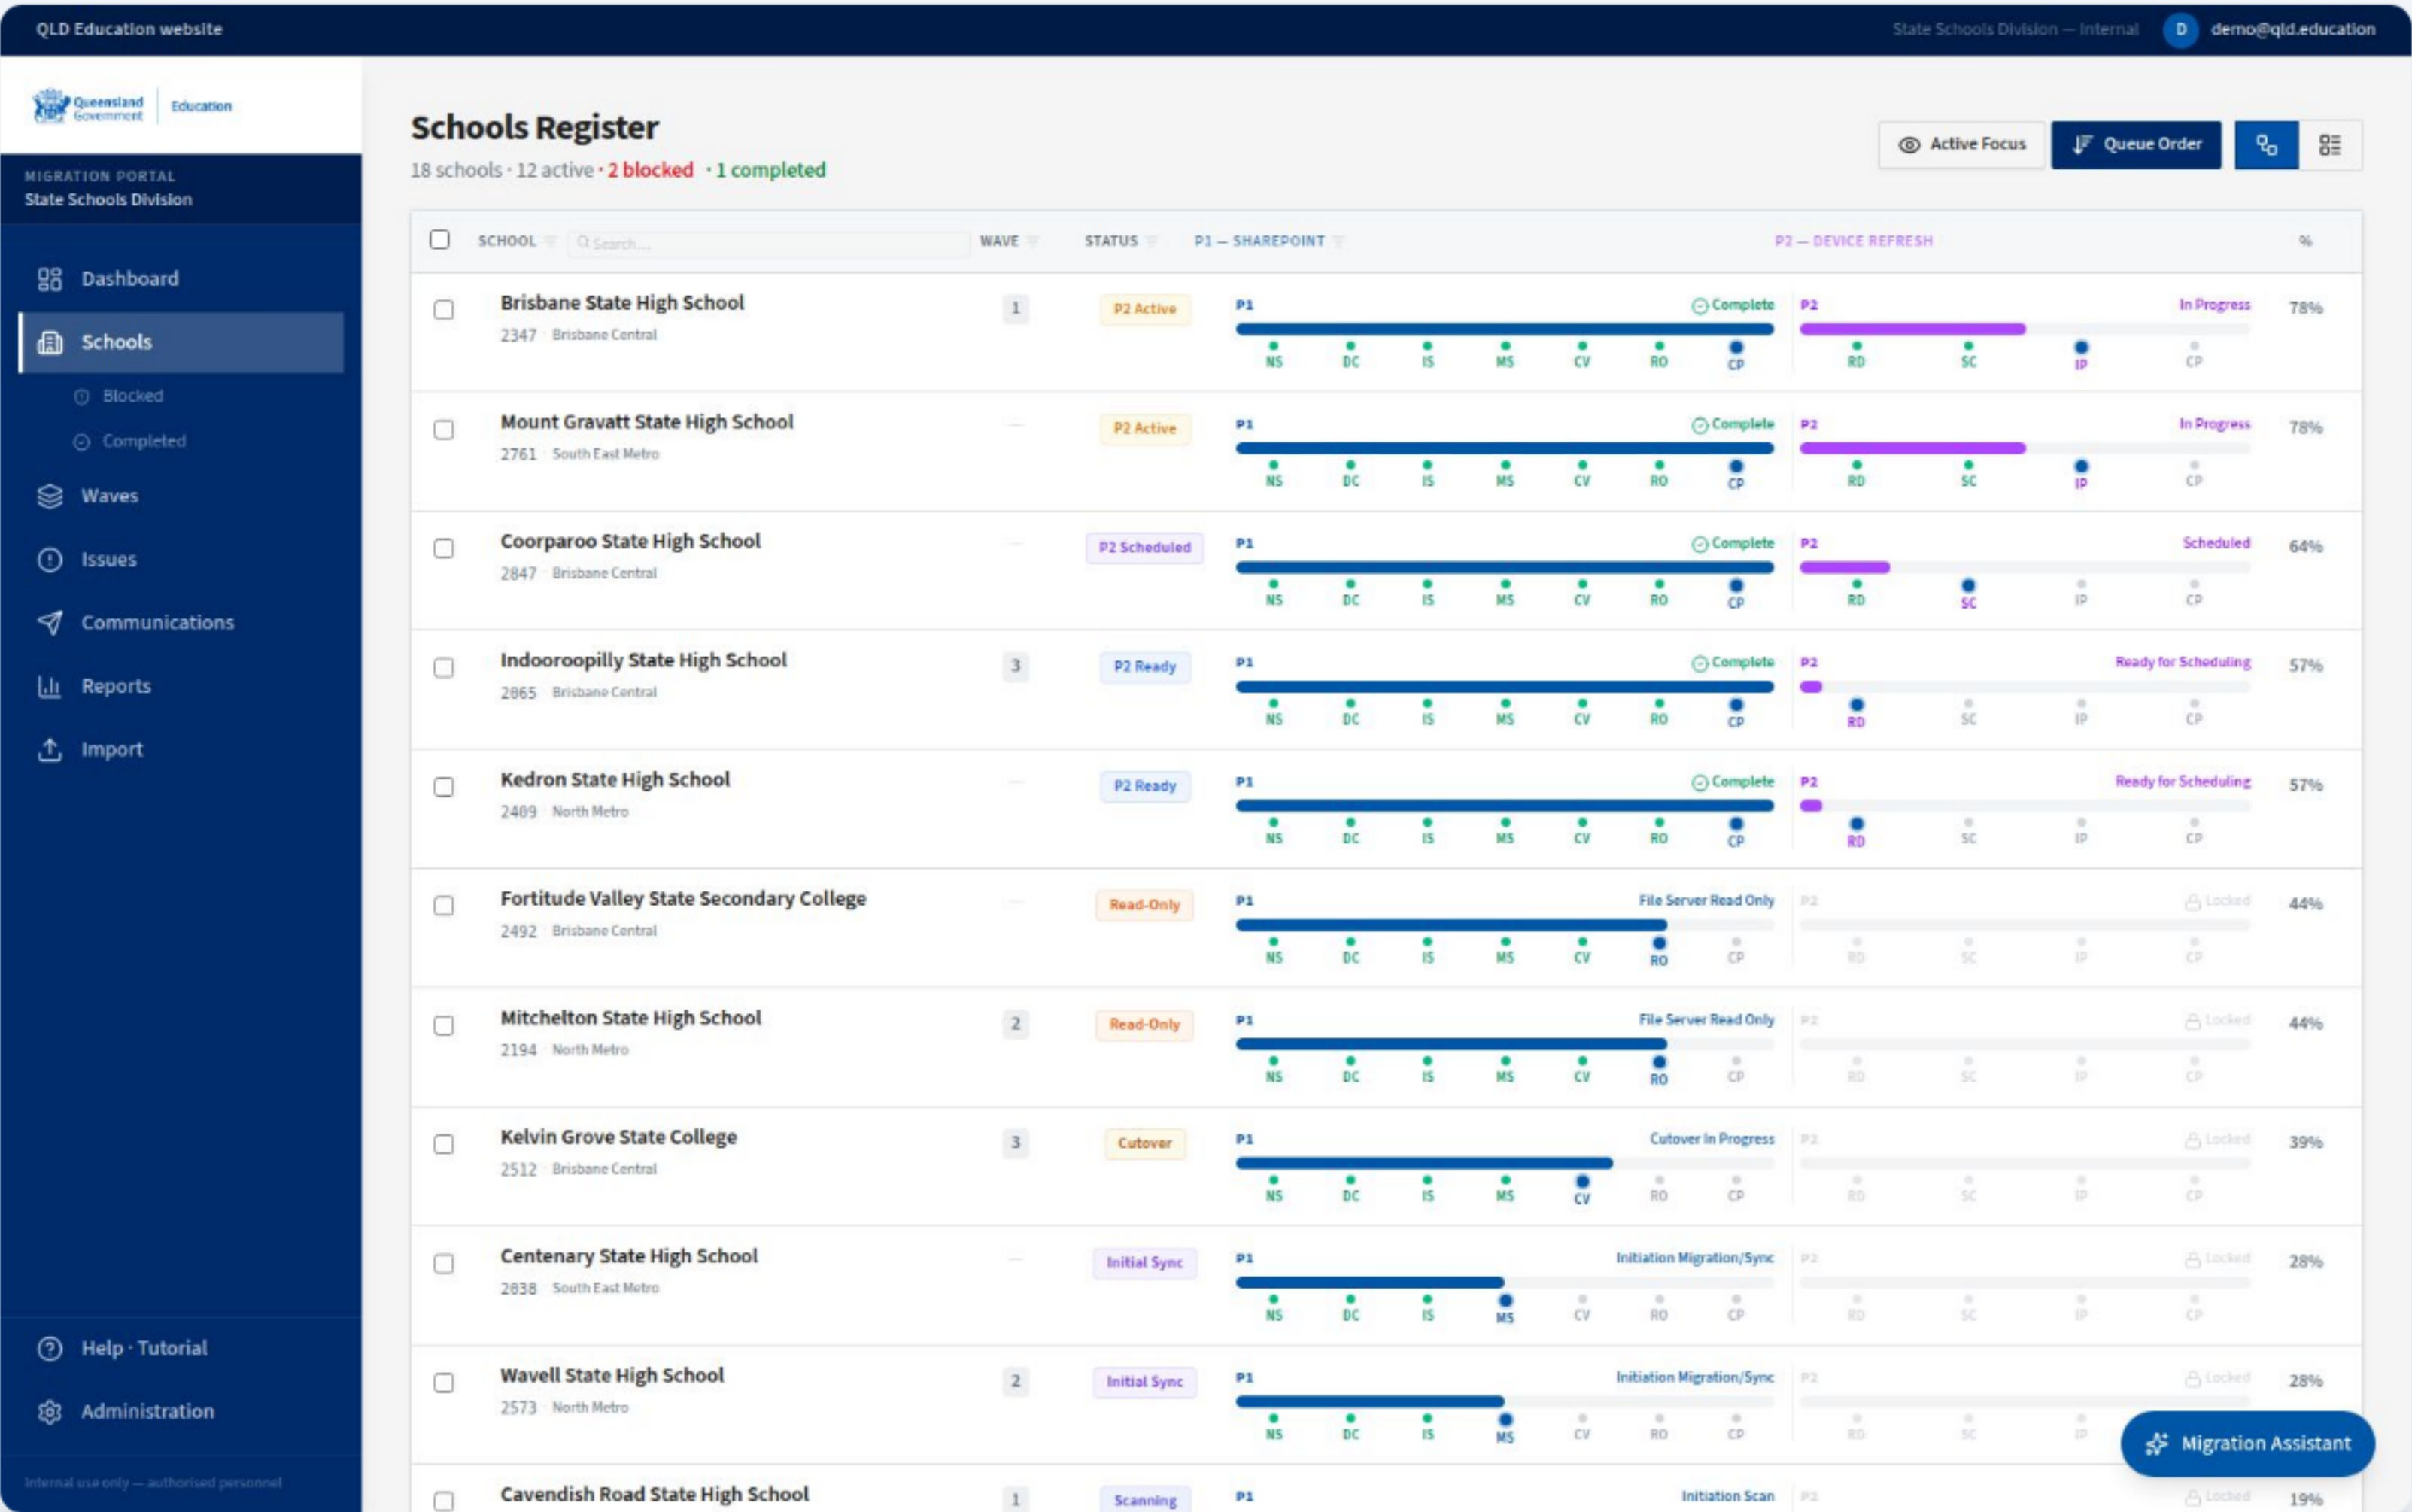

Filter to in-progress schools, sort by priority

Bulk Checkbox Actions

Select multiple schools — update status, send comms

Blocked and Completed Sub-views

Filtered views built into the sidebar navigation

Wave Management

Organise delivery into regional, time-boxed batches.

Wave Cards

Name, region, date range, school count per wave

Progress Tracking

Live progress bar and percentage per wave

Card, List, Split Views

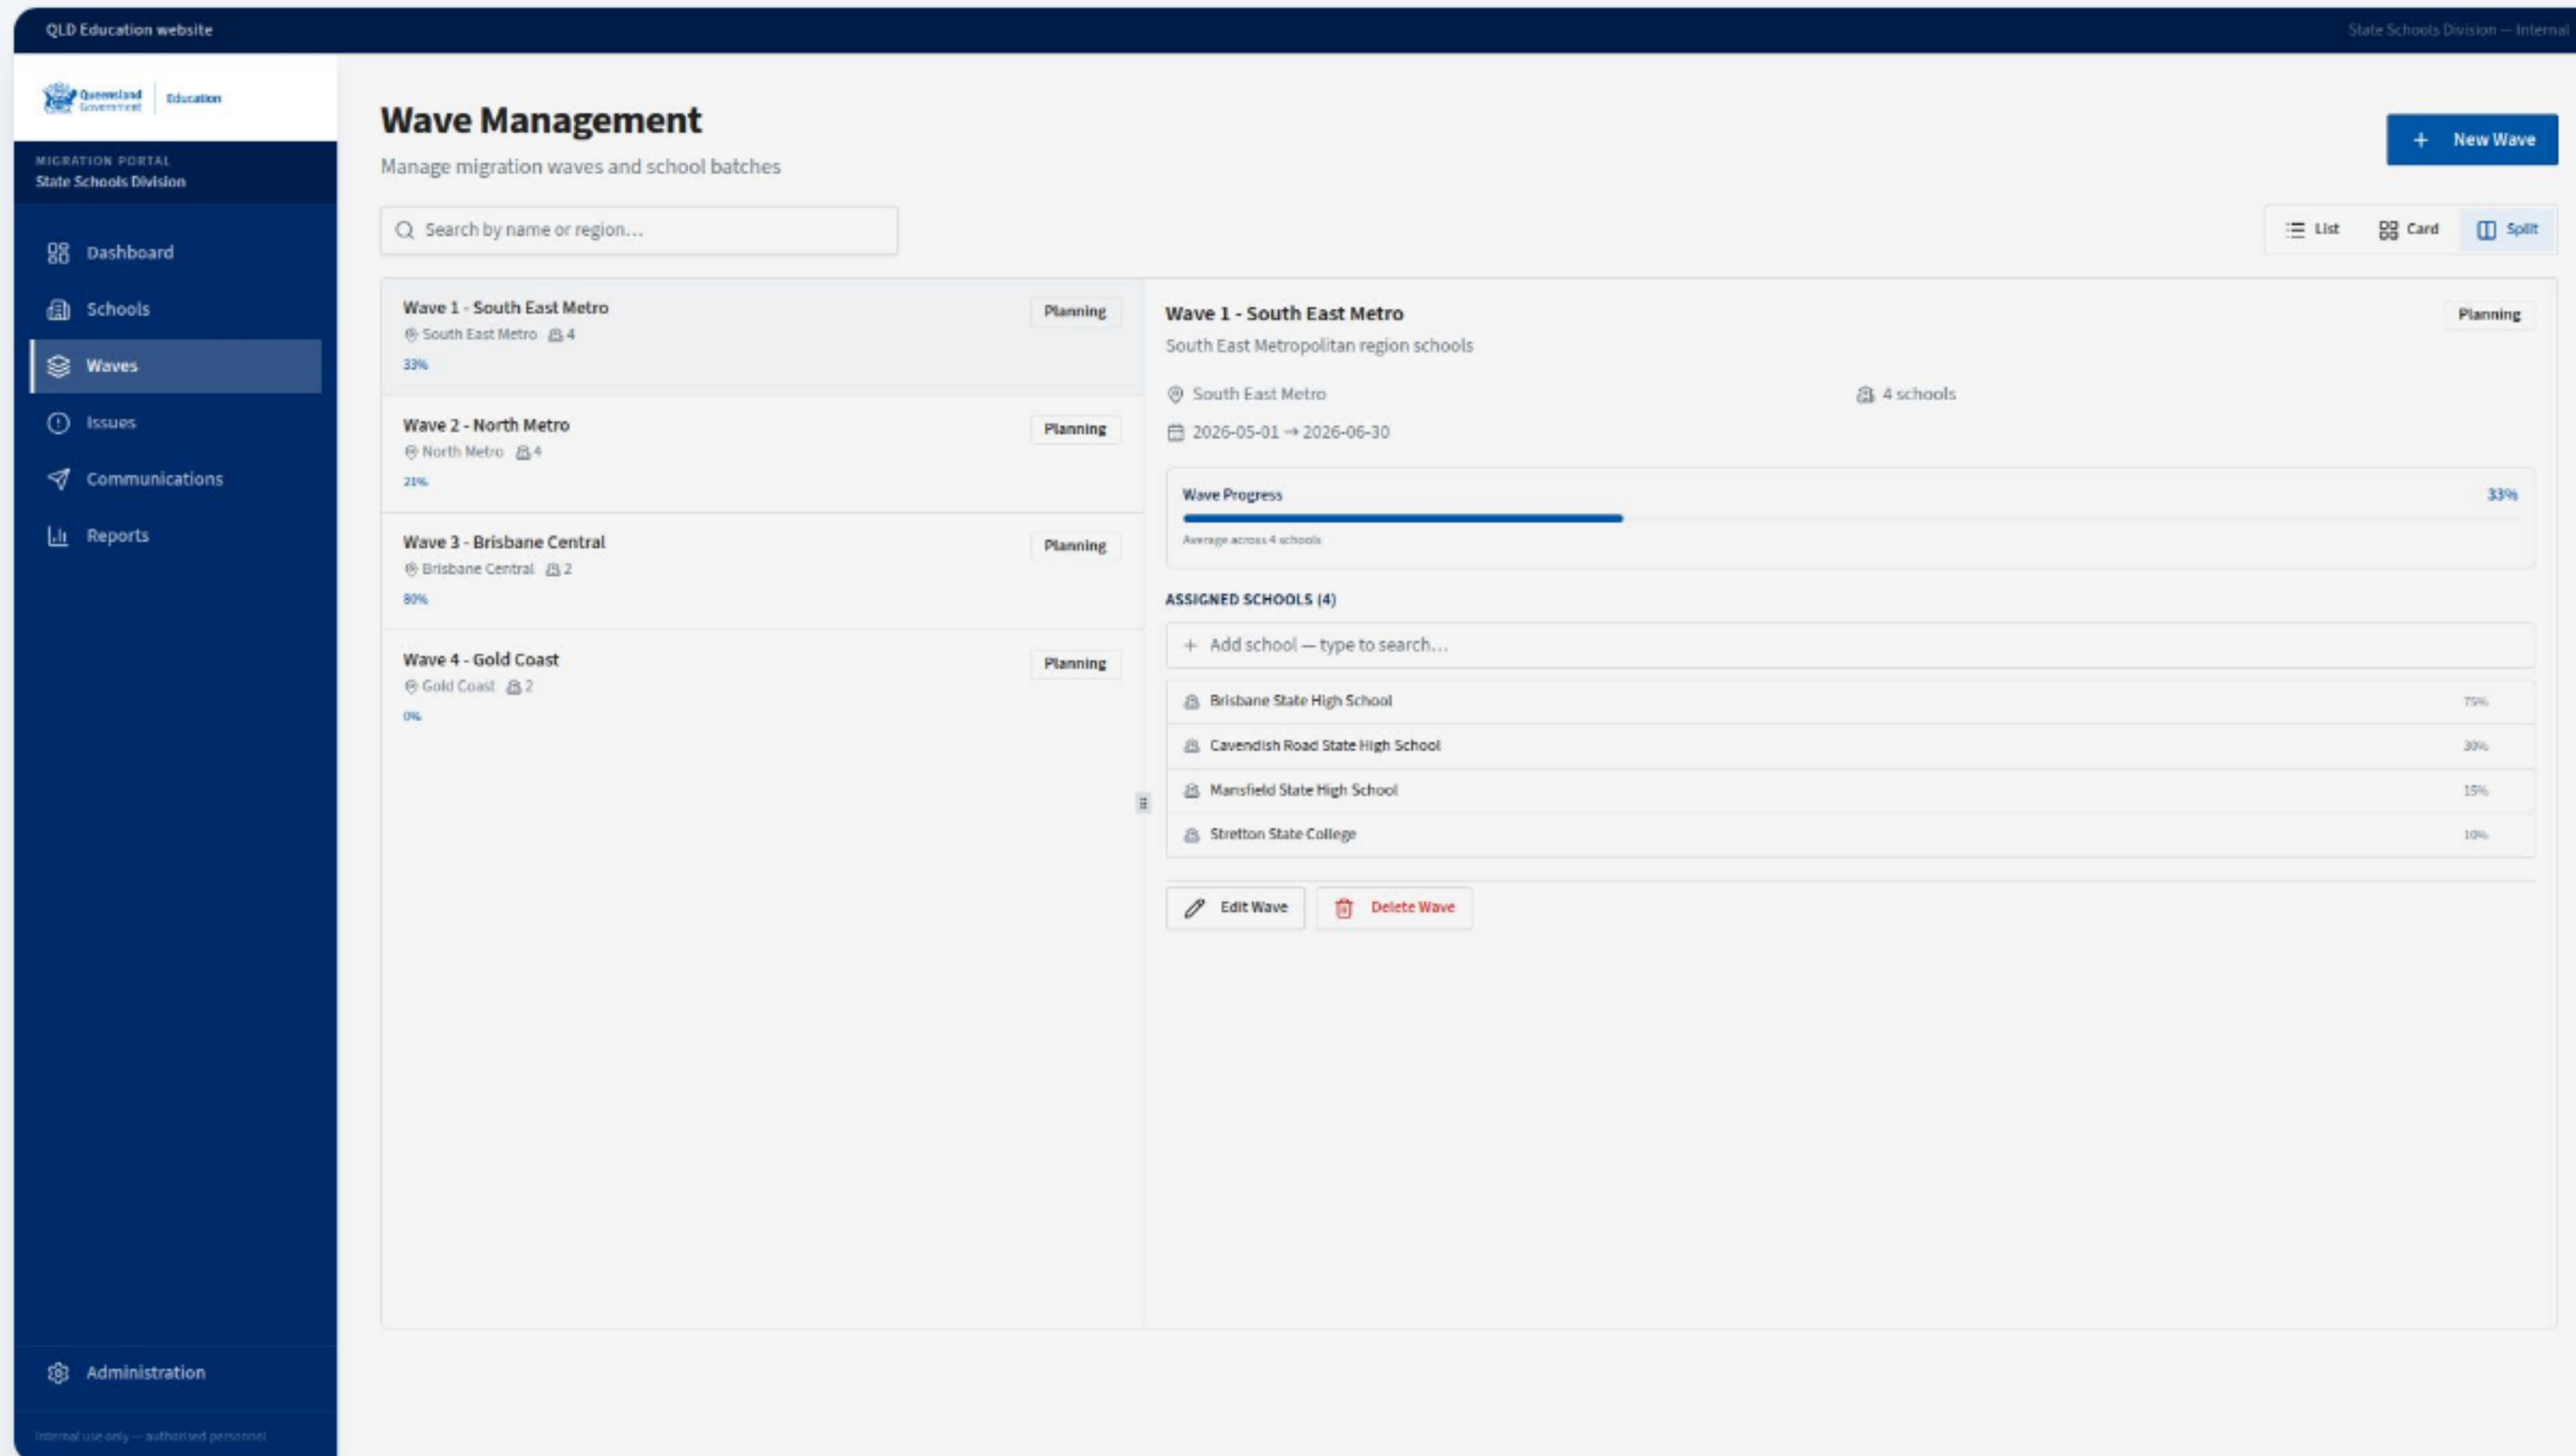

Three layout modes for different working styles

Create and Edit Waves

Configure name, region, status, and date windows

Search by Name or Region

Quickly locate waves across large programs

Issues Register

Track, triage, and resolve delivery blockers across the program.

- Summary Metric Bar**
Total Issues, Open, Critical, and Resolved at a glance
- Reference Numbers**
Auto-assigned ISS-001, ISS-002 etc. for tracking
- Severity Levels**
Critical, High, Medium, Low — colour-coded badges
- Status Workflow**
Open → In Investigation → Triaged → Resolved
- Owner Assignment**
Assign to team or individual with accountability
- Filter by Status, Severity, Category**
Find what needs attention immediately

Migration Assistant

Communications Hub

Template-driven comms with a full M365-aligned send workflow.

Send History Log

School, subject, recipient, trigger, date, and status

Templates Management

Manage Outlook-compatible email templates

Send Communication Action

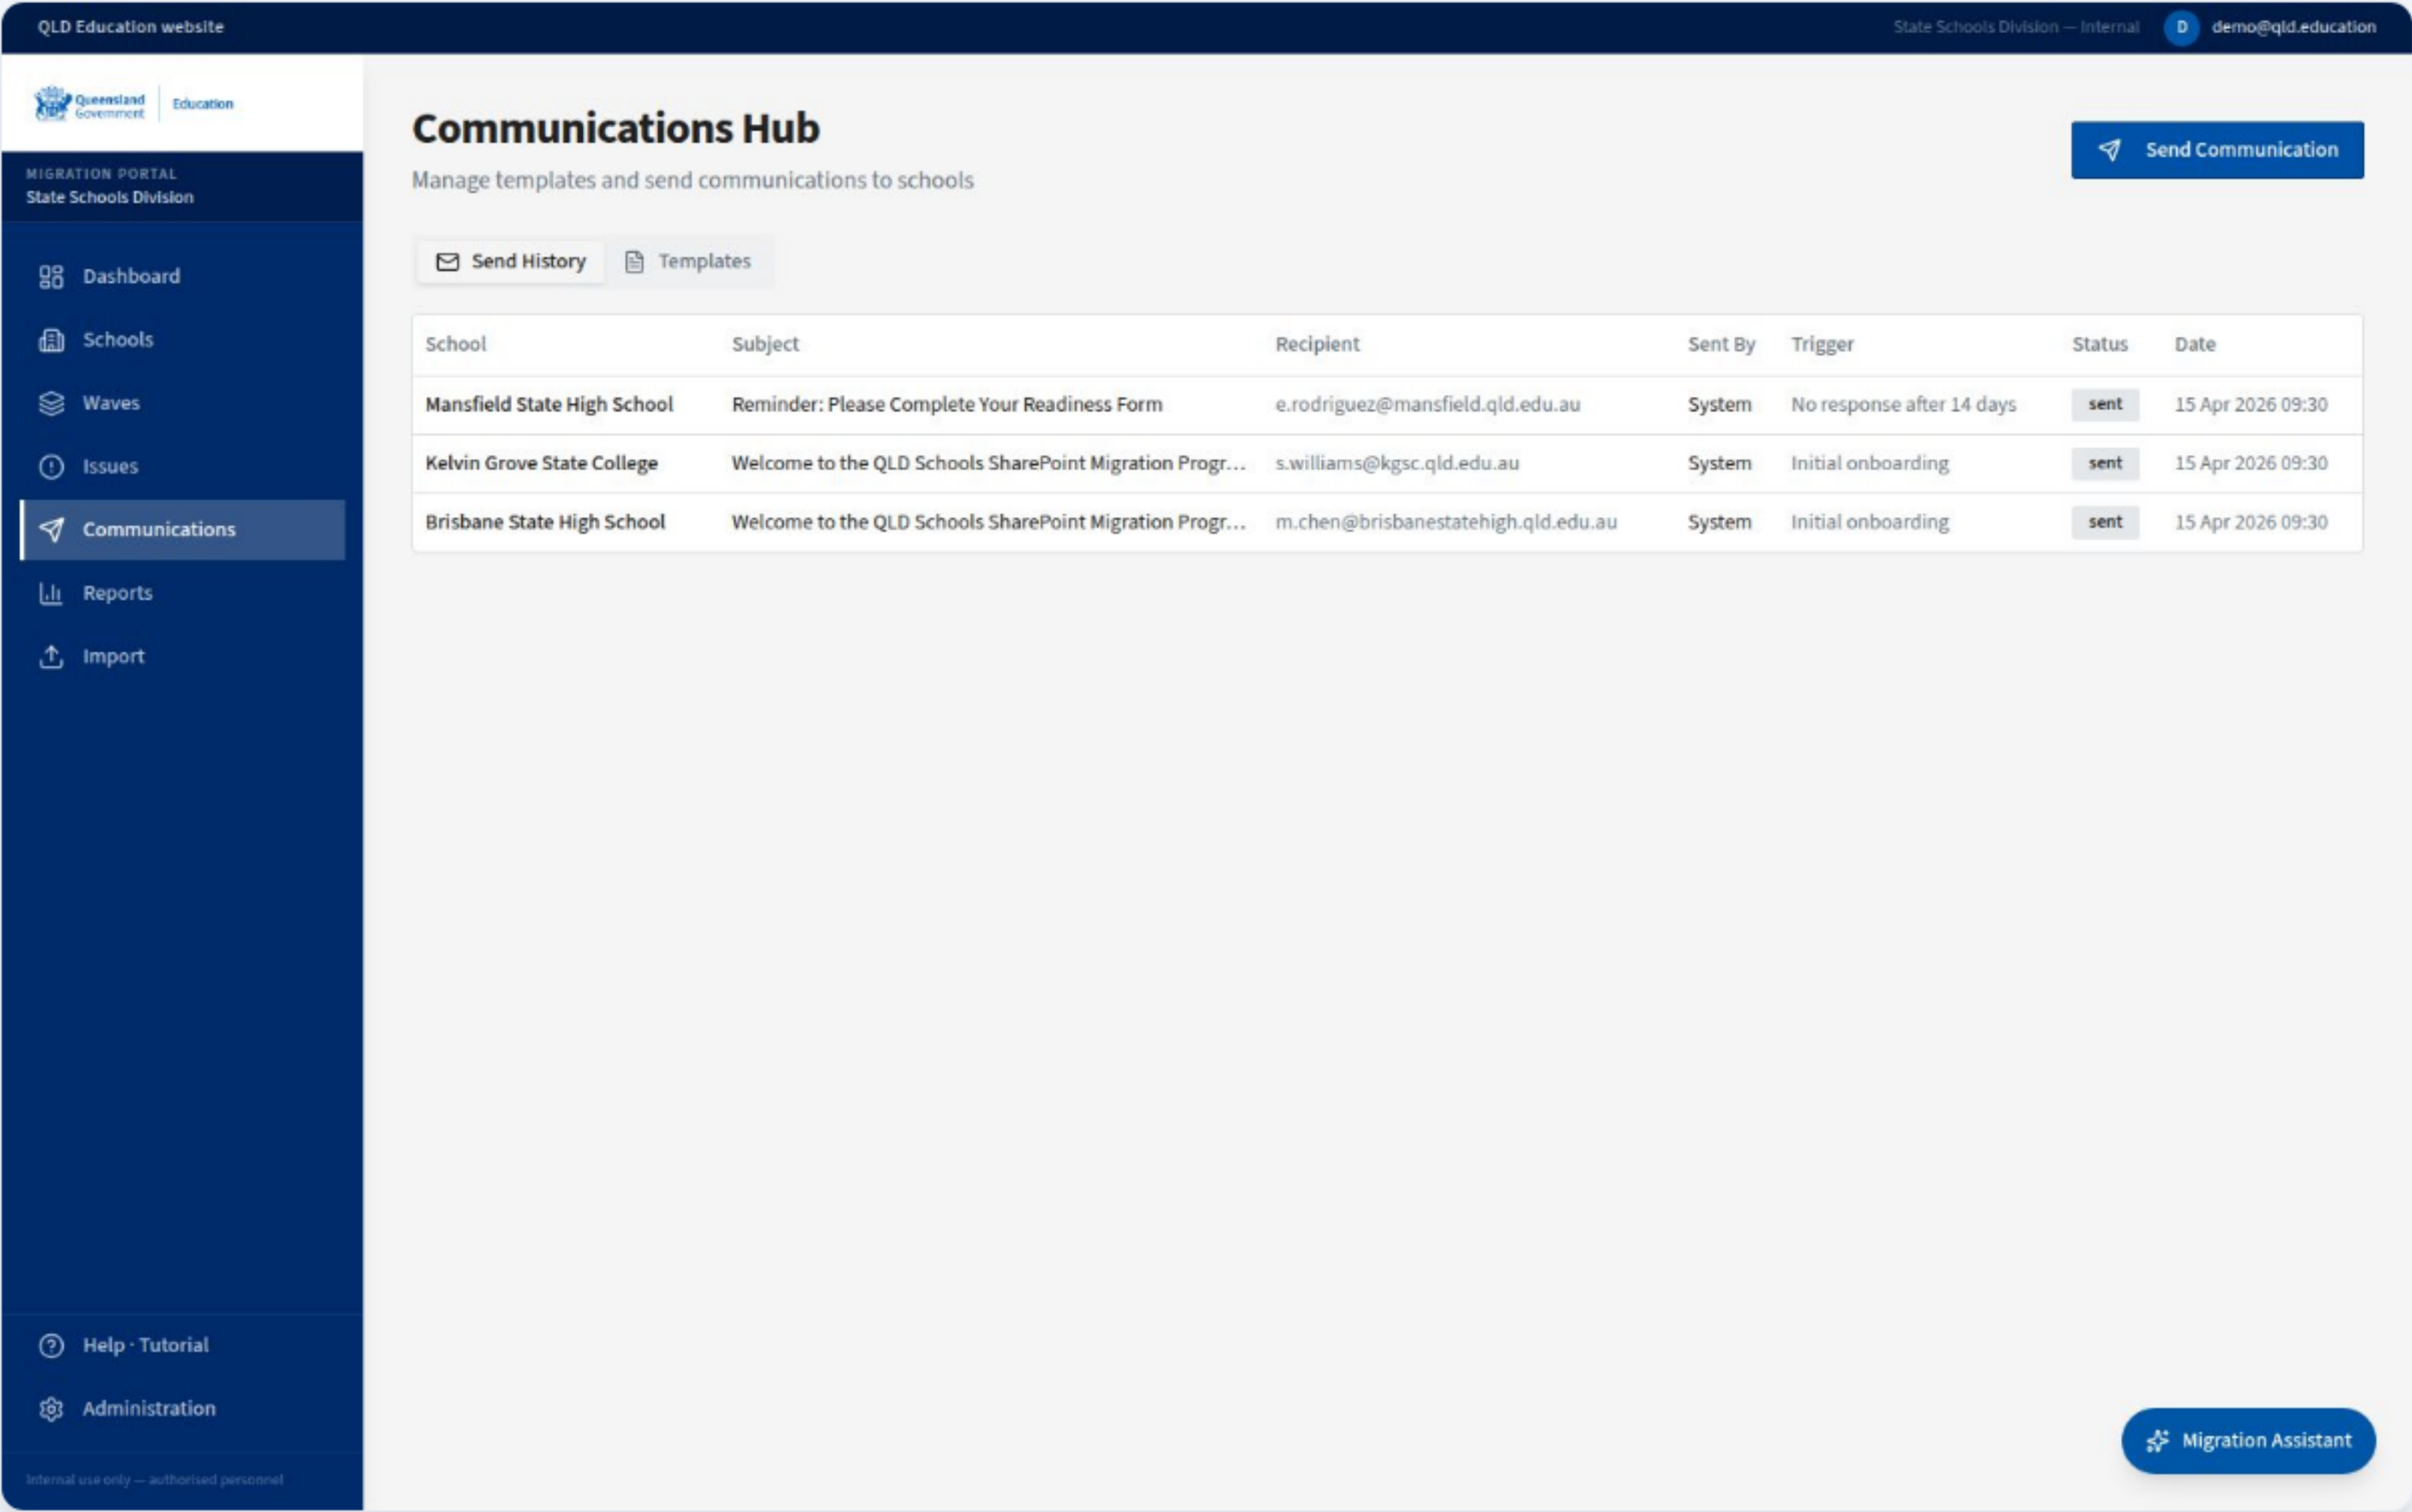

Opens Outlook with school contacts pre-populated in BCC

Trigger Tracking

System vs manual sends — with trigger reason recorded

Audit Ready

Every communication event logged in the platform

Reports

Program-wide migration status, analytics, and at-risk visibility.

Headline Metrics

Total Schools, Phase 1 Complete, Phase 2 Complete, At Risk

Phase 1 Status Breakdown

Pie chart — schools by current lifecycle stage

Phase 2 Status Breakdown

Bar chart — locked, scheduled, in progress, complete

Region Summary Table

Readiness submitted, P1 and P2 complete per region

At Risk / Overdue Schools

Flagged schools with phase, planned date, and issue count

Monthly Executive Summary

High-level snapshot for the executive team — programme KPIs, narrative status, and phase distribution.

MonthlyExecutive sponsors, Steering Committee

INCLUDES

- Programme KPI grid
- Executive narrative
- Phase 1 & Phase 2 status breakdown

Generate PDF

Project Progress Report

Cumulative delivery view across regions and waves with completion percentages.

Bi-weeklyProgramme Director, Regional Leads

INCLUDES

- Programme KPIs
- Regional performance table
- Wave delivery schedule

Generate PDF

Top Issues Report

Open risks, blockers, and overdue schools requiring leadership intervention.

WeeklyRisk Committee, Programme Director

INCLUDES

- Headline risk figures
- At-risk and blocked schools list
- Issue notes

Generate PDF

Wave Performance Report

Wave-by-wave delivery progress, status, and assigned school counts.

Per wave milestoneWave Coordinators, PMO

INCLUDES

- Wave summary KPIs
- Status of every wave
- Schools per wave

Generate PDF

Region Breakdown Report

Per-region readiness, Phase 1 and Phase 2 completion percentages.

MonthlyRegional Directors

INCLUDES

- Schools by region
- Readiness submission rates
- Phase completion percentages

Generate PDF

At-Risk Schools Report

Detailed list of schools that are flagged at risk or overdue, with school codes and issue notes.

Ad hoc / WeeklyOperations leads, Field engineers

INCLUDES

- Summary statement
- School-level detail with codes
- Planned dates and issues

Blocked Schools

Schools with a Phase 1 or Phase 2 status of Blocked / At Risk requiring intervention.

2 schools currently blocked

Open each school to log a resolution or escalate via Issues.

Search by name, code or region...

Code	School	Region	Wave	Blocked Phase	P1 Status	P2 Status
2653	Ferny Grove State High School	North Metro	—	Phase 1	Blocked/At Risk	Locked
2456	Stretton State College	South East Metro	Wave 1 - South East Metro	Phase 1	Blocked/At Risk	Locked
2 schools blocked						requires intervention

Migration Assistant

TOUR · 7 OF 9

Blocked Schools

A dedicated view for schools requiring immediate intervention.

- Intervention Alert Banner

Count of blocked schools with prompt to act
- Blocked Phase Indicator

Phase 1 or Phase 2 blocked, shown clearly per row
- Region and Wave Context

Understand where the school sits in the delivery plan
- Requires Intervention Tag

Highlighted call to action in the table footer
- Search Across Blocked Schools

Filter by name, code, or region within the view

Administration

Operate the platform — health, security, AI controls, and full traceability.

Overview Tab

Programme health and system metadata at a glance

Audit Log Tab

Every change recorded — who, what, when, including sign-ins

AI Assistant Tab NEW

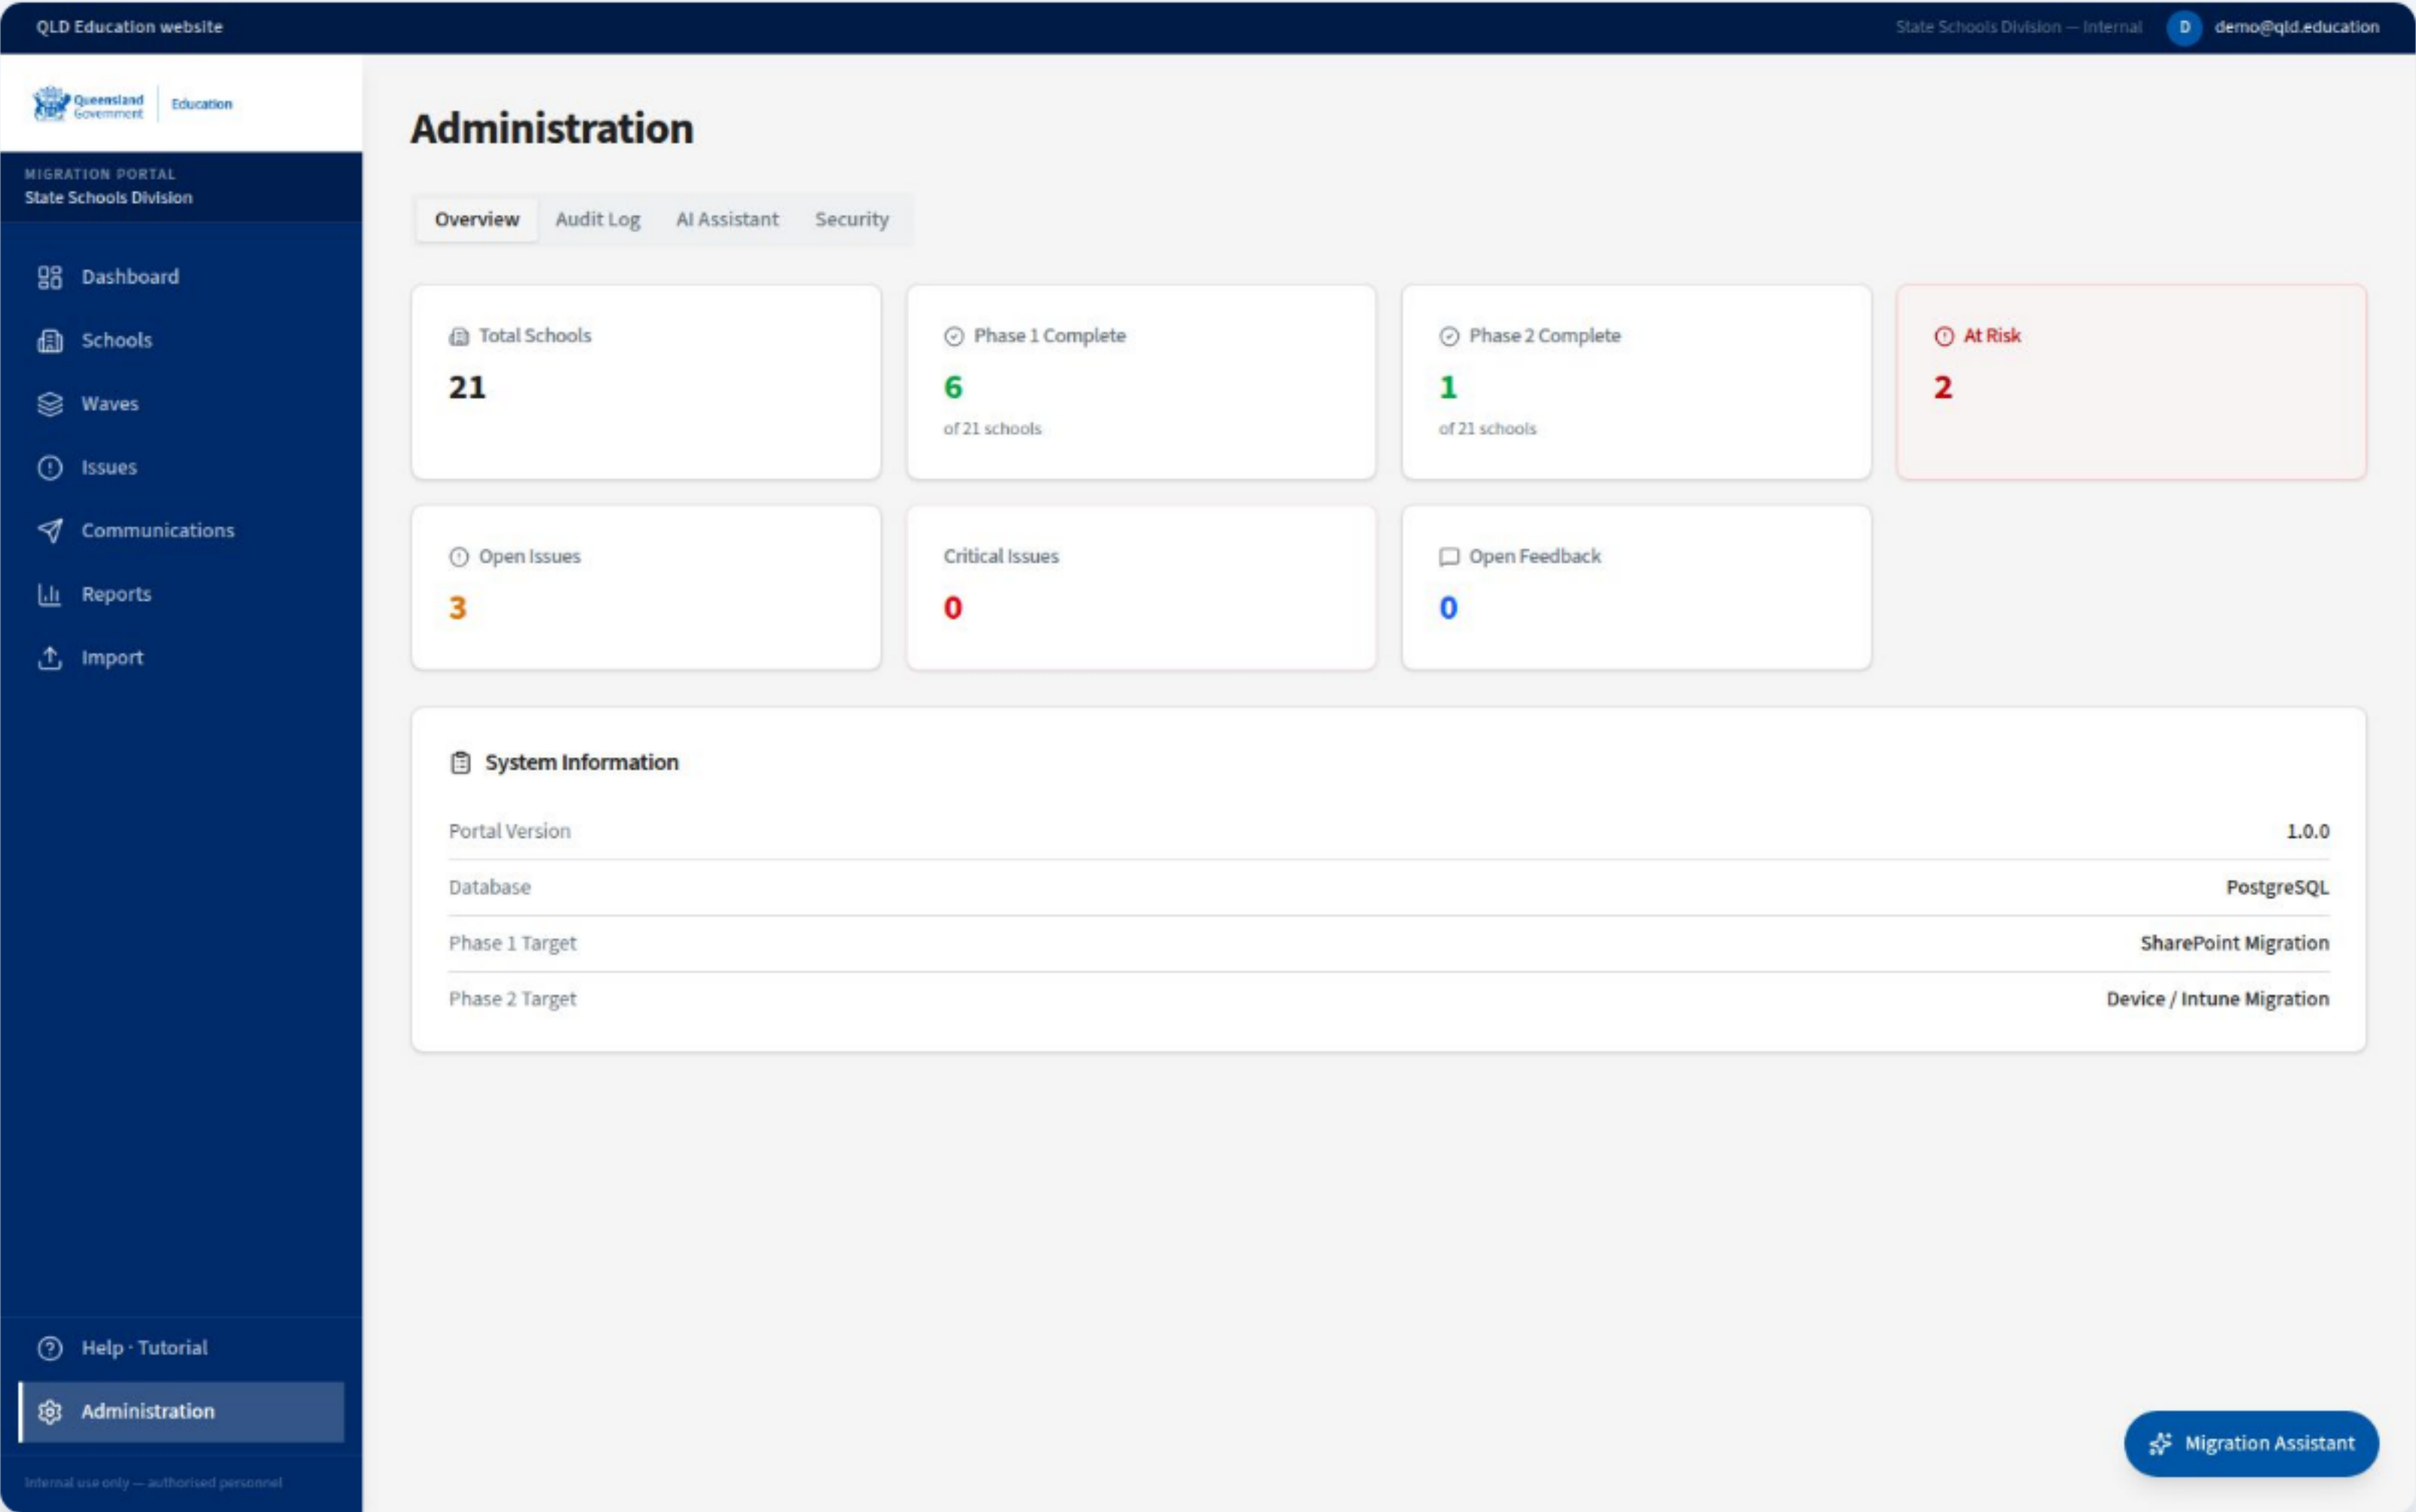

Toggle assistant on/off, choose model, set daily message cap

Security Tab NEW

Session policy, rate-limit settings, recent sign-in activity

User Feedback Inbox

In-app submissions queued for triage

Import

Bulk-load or update school records from a CSV or JSON file in seconds.

Downloadable Templates

Pre-populated JSON and CSV templates — ready to fill in

Drag and Drop Upload

Drop a JSON or CSV file directly, or click to browse

Create and Update in One Pass

Existing schools matched by code and updated; new codes created

Pre-flight Validation

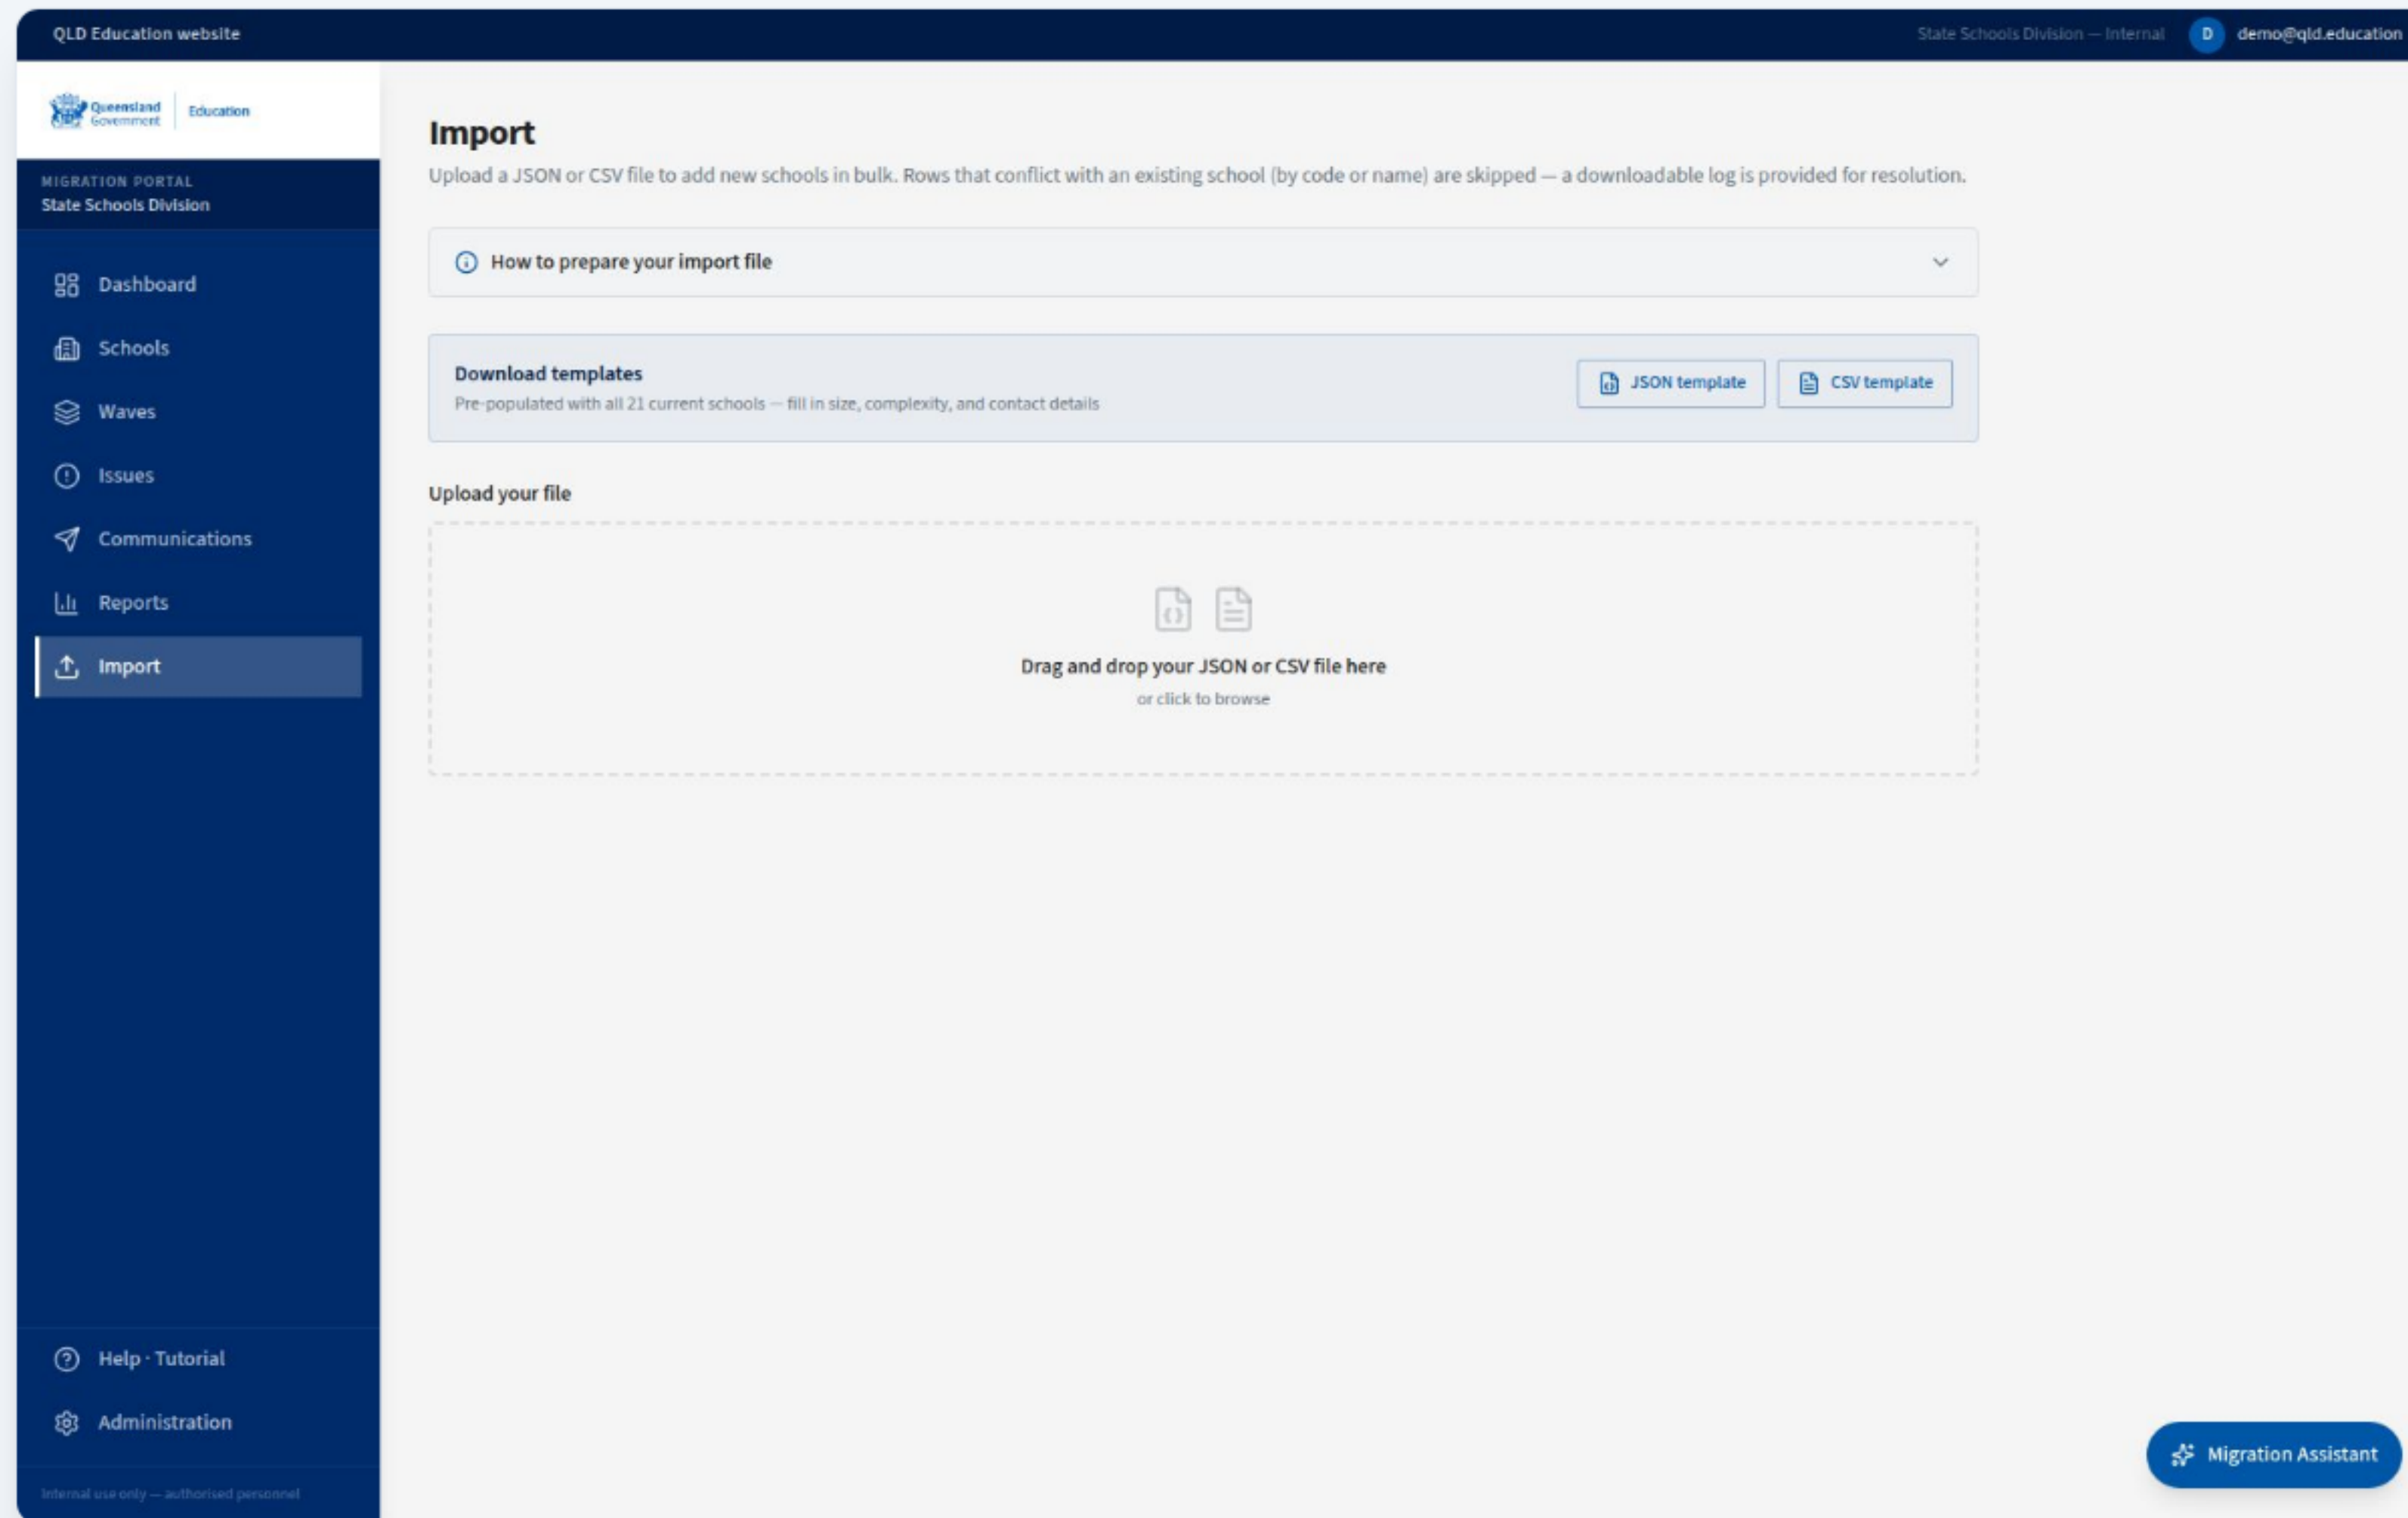

Row-level errors surfaced before anything is committed

Rich Field Support

School code, name, region, size, complexity, and up to 3 contacts

Preparation Guide

Expandable how-to section with field reference and format rules

TOUR · 10 OF 11 · NEW

In-App Onboarding

A guided walkthrough that introduces every page on first sign-in — replayable any time from Help.

11-Step Guided Tour

Spotlights every page and the most important controls

Auto-Launch on First Visit

New programme staff orient themselves in under a minute

"Don't Show Again"

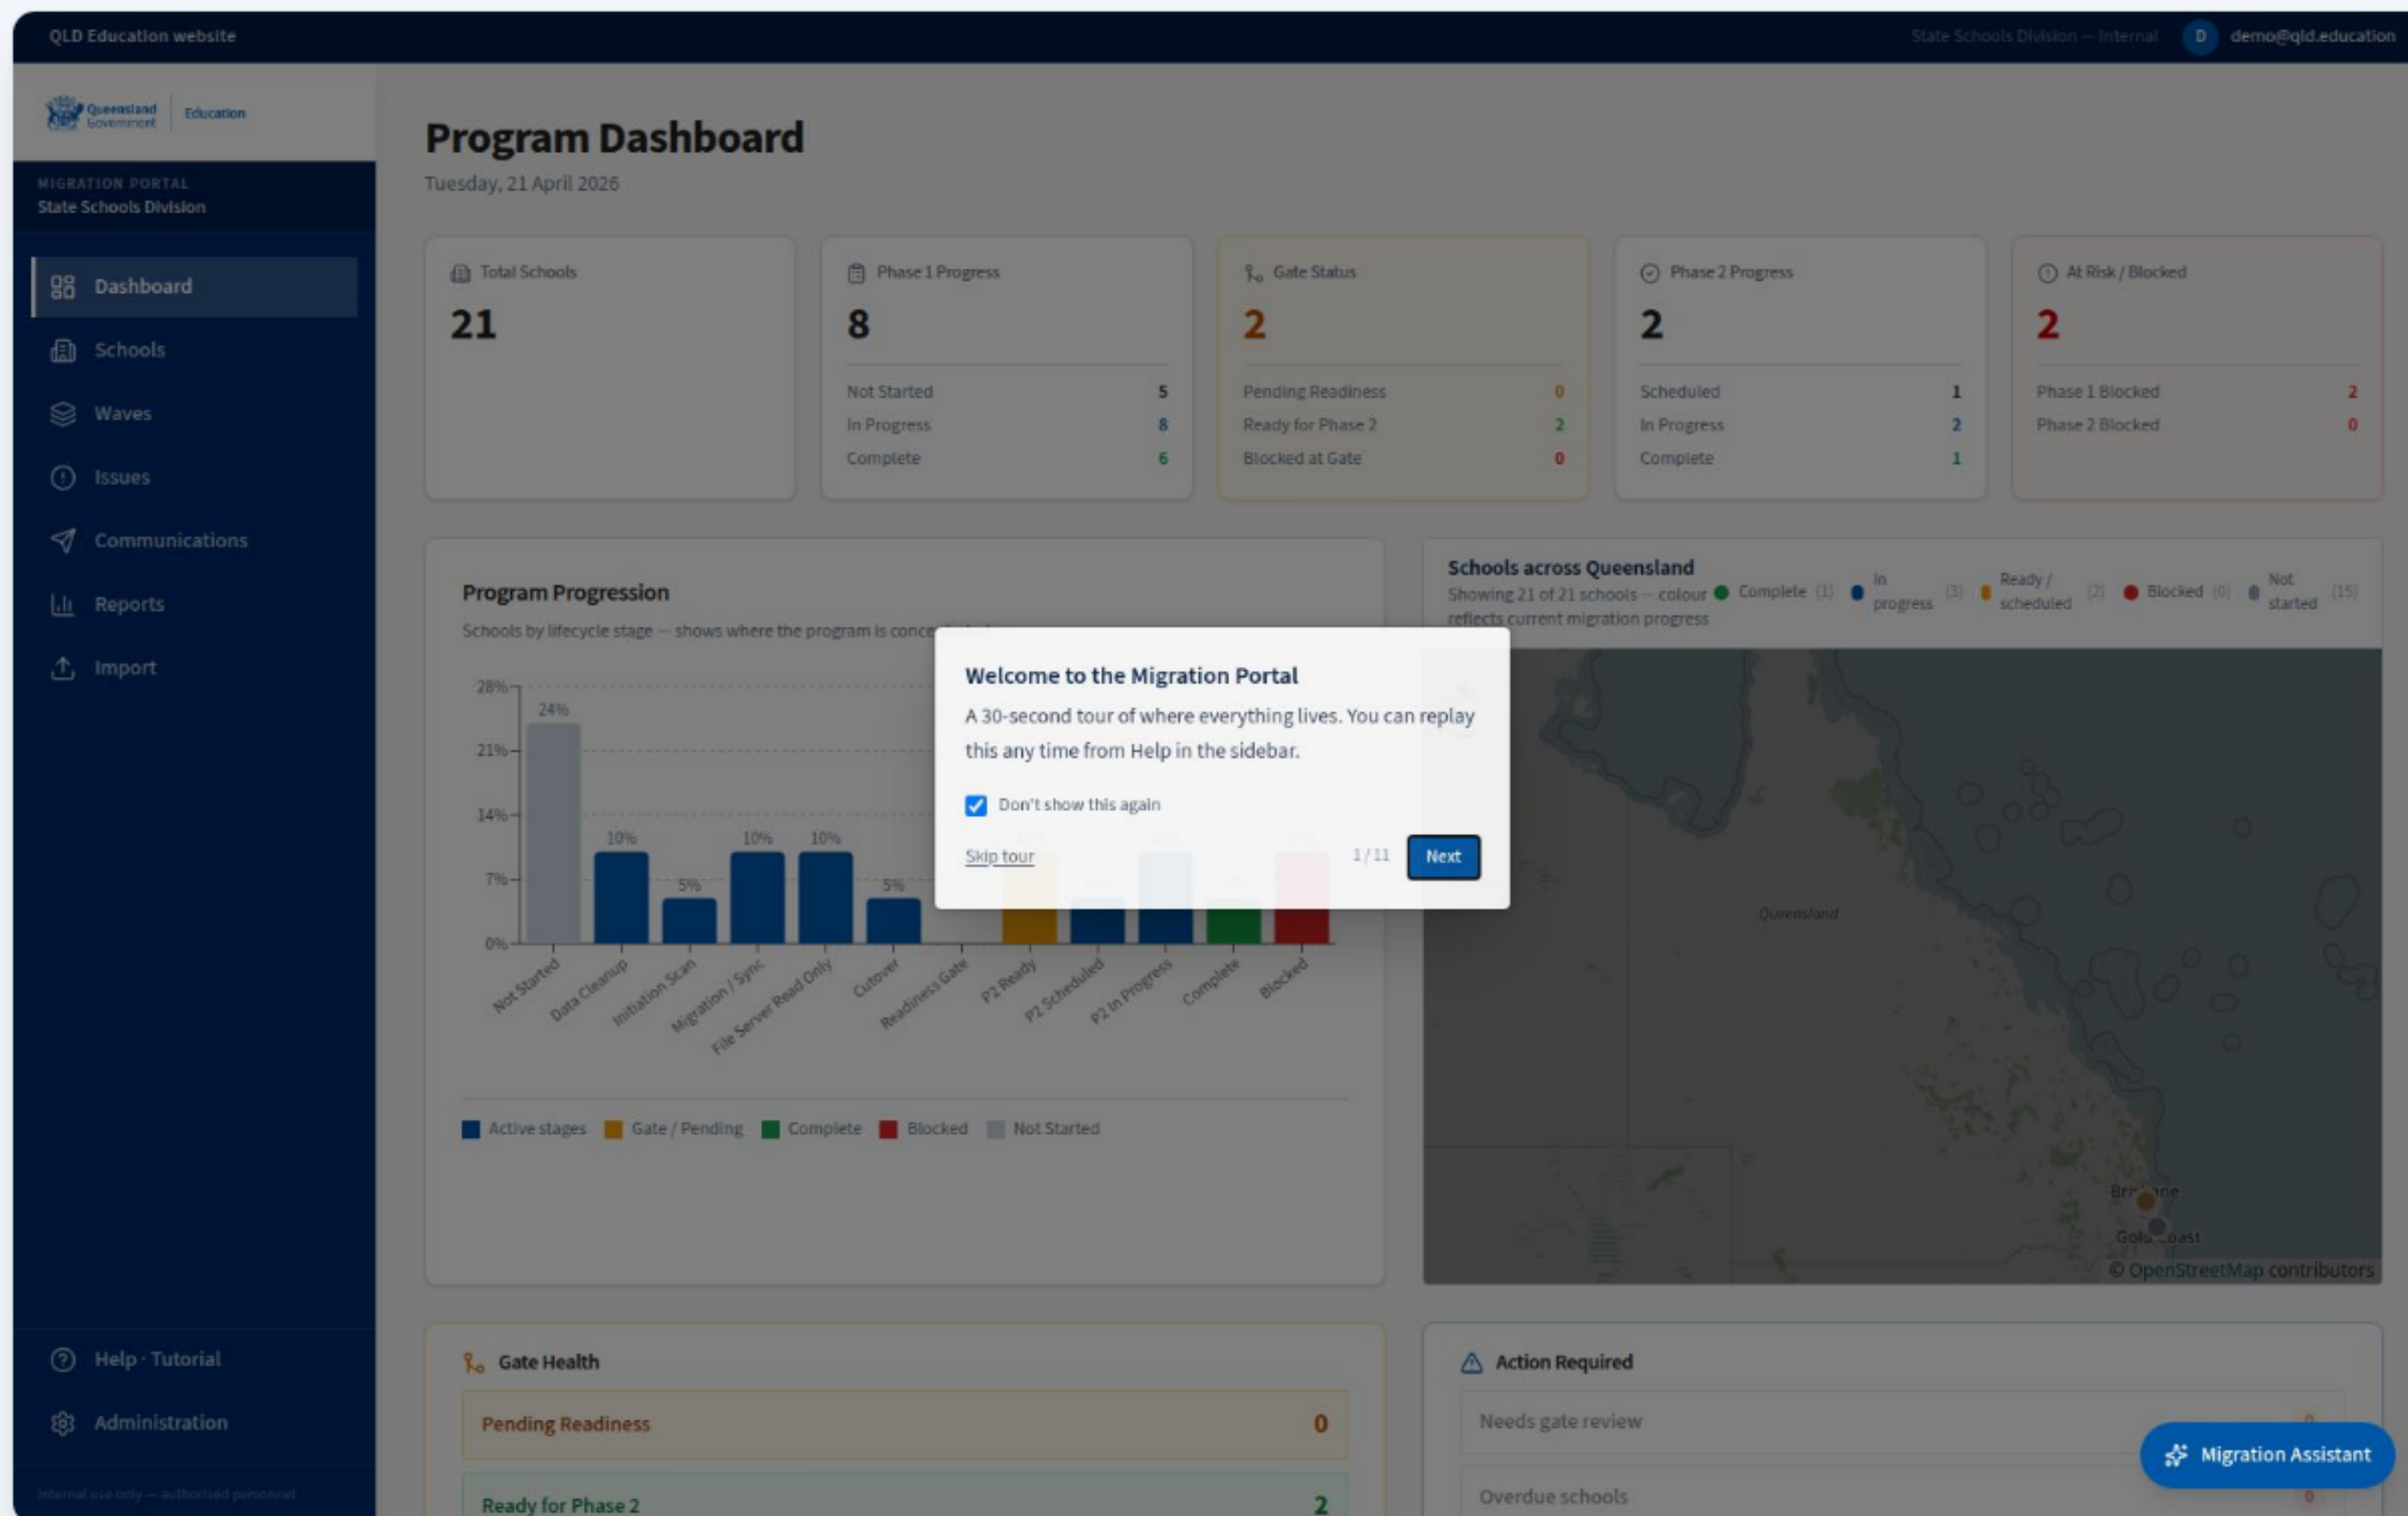

Remembers preference per device — never nags returning users

Replay from Help

Sidebar shortcut re-runs the tour whenever needed

Cuts Training Burden

Less hand-holding for regional coordinators joining mid-programme

TOUR · 11 OF 11 · NEW

Migration Assistant

A built-in AI chatbot grounded in live programme data. Answers questions in plain English — no SQL, no spreadsheets, no waiting on a report.

Read-Only by Design

Cannot edit data — politely declines write requests

Admin Controls

Toggle on/off, choose model, set daily message cap

Persistent FAB

Always one click away from any page

Grounded in Live Data

Every answer cites the current programme snapshot

Australian English

Concise, professional tone — no emoji, no fluff

Daily Cap + Audit

Cost-controlled, rate-limited, fully auditable

 **Migration Assistant**
Live programme data

Which schools are blocked right now?

Two schools are currently blocked at Phase 1:

- Ferny Grove State High School (2653, North Metro)
- Stretton State College (2456, South East Metro)

Open the Issues page for resolution detail.
